

New Product Announcement

FNB-VI29LIIS Universal Energy (UNI) IS Battery

North America

February 2015

Now Available! Universal Energy (UNI) IS solution for High Tier models

The UNI energy system takes energy interoperability to a new level by utilizing a single charger base to support multiple radio series when used with designated UNI batteries. This solution is a convenience for customers, a reduced burden on your dealership's inventory and best of all, will not increase the cost of your radio and aftermarket accessory purchases you are making today.

The chart below provides the details on the newest Intrinsically Safe addition to the UNI portfolio. Please see updated price pages for further details.
