HELPFUL INFORMATION

DIRECTOR'S MESSAGE –

It's hard to believe that Winter is here already. This Fall just flew by and now the staff at Recreation and Parks is ready to present you and your family with a great line up of classes, special events and facilities where you can hold holiday events. Please take a few minutes to go through this guide and find something that interests you, sign up and enjoy!

I would like give you a couple of updates about projects you see under construction around the City of Santa Maria and how your Recreation and Parks Department is hard at work ensuring that these projects keep up the tradition of being attractive and well maintained. Last issue I mentioned to you the Enos Ranchos commercial development at Betteravia and Bradley Roads. Soon you will see Bradley Road re-connected from Betteravia to Battles, making it a straight shot to the Costco Center and Hancock College. On either side of the new Bradley Road you will see the following businesses under construction; Lowe's Home Improvement, a new Costco, Coast Hills Credit Union Administration office, and a few new restaurants will be featured. At some point this winter College Drive will be closed for reconstruction, and traffic will be diverted to Miller Street and Bradley Road as a detour. New landscaping will be installed along all streets with large planting spaces providing the opportunity for more landscaping. Seven acres of the entire project will be a new park which will feature the preservation of the historic Smith

– Enos Home. This winter the house will be placed on its permanent foundation and renovation efforts will begin, as well as a fundraising for the project.

The City of Santa Maria will also begin the renovation of historic Buena Vista Park, the City's first park. A complete remake of the park will bring it up to date, while honoring its historic past. The park will feature a formal entrance, historic panels, sculptures, performance area, grass play field and support facilities. Look for this project, which is funded by Community Development Block Grant funds, to get underway in the Spring of 2017.

The first steps have been taken to help determine how to develop new sports fields in the City. A grant application for \$1 million dollars was recently submitted to the State of California for consideration. A special committee has been formed to plan the next steps in improving access to sports fields. Let us know if you are interested in more details.

Recreation programs will continue after school at local parks this Winter and Spring. Depending on the weather, recreation staff will be on site in the afternoons offering sports and other fun activities for neighborhood children. Details can be found in the guide.

Please have a great holiday season, and let us know of any programs, services or facilities issues, concerns or compliments you may have - we'd love to hear from you!

Alex Posada, Director of Recreation and Parks Department

The Santa Maria Recreation and Parks Department asks residents to take precautionary measures against mosquito bites when enjoying our beautiful parks and trails.

- Zika is an infectious disease transmitted through the bite of the Aedes mosquito. Symptoms of infected individuals include: fever, rash, joint pain, and/or red eyes. The mild symptoms may last up to a week and rarely require hospitalization. A Zika infection during pregnancy may result in microcephaly birth defects—abnormal brain development resulting in fetus head deformation.
- Although the virus has not been reported in the Western United States, you are encouraged to prevent disease spread by avoiding mosquito bites. As there is no vaccine for Zika, it is recommended that you use DEET-based insect-repellants, drain standing water around your home (mosquitoes lay eggs in standing water), limit outdoor activity during times mosquitoes are most active (dawn/dusk), and dress in long and loose light-colored clothes to avoid getting bitten.
- Should you suspect you're carrying the virus, get plenty of rest, keep yourself hydrated, consult a healthcare provider about fever and pain medication, avoid aspirin and anti-inflammatory drugs, and refrain from unprotected sexual activity to prevent sexual transmission of the virus.
- The Santa Maria Recreation and Parks Department is proactively monitoring and surveying municipal bodies of standing water and park sites—using mosquito-eating fish and EPA products to kill mosquito larvae—and making an effort to reduce areas of standing water.

For more information about the Zika virus visit the Centers for Disease Control and Prevention (CDC) and California Department of Public Health websites: www.cdc.gov/zika and www.cdph.ca.gov respectively.

Questions may be directed to the Santa Maria Recreation and Parks Department's Vector Control staff at (805) 925-0951 ext. 2356.
