CATALOG A-10

IN MEMORIAM

In memory of one who has contributed so much to the growth of the HOYT organization and the sport of archery, we dedicate this catalog to Earl (Pop) Hoyt. "Pop" was held in the highest esteem by all who knew him and his integrity and pride in quality of workmanship became a symbol of the Hoyt product. To the perpetuation of this high ideal the Hoyt Archery Company, Inc., rededicates itself.

Specially designed precision equipment is used in this modern plant to produce the world famous Hoyt Pro bows.

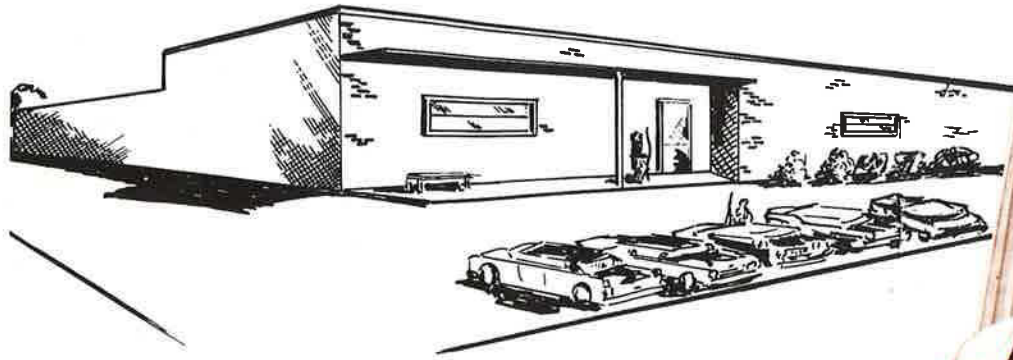

Careful hand craftsmanship by experts insures the perfection and ultimate refinement necessary to achieve the highest possible standards of quality for which the Hoyt Pros are known.

Final results are scientifically checked on this ultra precision electronic chronograph. Here also experimental bows are carefully evaluated and development of the worlds foremost line of bows is achieved.

ARROW LENGTHS

HOYT PRO 300

Versatility is the word for this sensational all-around bow - - equally suited to hunting or tournament shooting. Characterized by superb performance, accuracy that will surprise you, and craftsmanship of the highest degree, the PRO 300 is a worthy successor to one of the most popular bows of all time!

64"/30" DRAW LIMIT
Weight to 65 lb. at 28"

\$62.00

HOYT XPERT

The XPERT has functional beauty . . . ranging from its attractively laminated handle to its graceful re-curve with overlay bow nocks. There's top quality, too, in the Xperts performance . . . its soft draw and smooth action. See one at your dealers and you'll agree the Xpert is a value-packed performer.

Available in 64" utility length
Draw limit 30"
Weights to 55 lbs., at 28"

\$39.50

The totally new

PRO MEDALIST BOW

World's Most Accurate Shooting Bow!

A bold new concept of engineered design brings you tomorrow's most advanced bow styling—combining functional beauty with superior performance and unerring accuracy that is far beyond that of normal bows in use today!

The Pro Medalist is a revolutionary new idea in bow design—a totally new concept of construction embodying the sound principles of applied engineering to bring you the most stabilized bow ever devised! The Pro Medalist features unique Torque Stabilizers* which phenomenally increases the mass moment of inertia about the bow grip for an amazing gain in fully controlled shooting accuracy! Destined to be the leading tournament bow of tomorrow—you are invited to experience the exciting new thrill of shooting the remarkably different Pro Medalist bow today!

The new HOYT STABILIZERS are easily detachable for convenience in transporting . . . are quickly attached in a few seconds. The TORQUE STABILIZERS are artistically designed for added beauty and are gold plated in keeping with the luxurious decorum of this exquisite bow.

Additionally, the PRO MEDALIST features the now famous †Patented Pistol Grip with exclusive Thumb Rest . . . plus †Patented Dyna-Poise (dynamically balanced) bow limbs that further compliments the inherent accuracy of performance attained by the new HOYT TORQUE STABILIZERS to a degree beyond comparison to all other bows.

62"/29" DRAW LIMIT
66"/31" DRAW LIMIT
70"/33" DRAW LIMIT
Weights to 65 lbs. at 28"

\$124.50

Enhancing the exciting magic of this new concept of bow performance, never before attained, is a new, exotic beauty of functional, classic design . . . incorporating rare imported hardwoods artistically handcrafted and finished to jewel-like perfection . . . creating a truly luxurious instrument.

HOYT PRO CUSTOM

A tournament bow of the highest order, created for those who demand the finest. *Patented Dyna-Poise (dynamically balanced) bow limbs insure synchronized limb action, offsetting the unbalanced effect of normal, below the line-of-draw, bow grip pressure and thus imparting a "true-trajectory" flight to the arrow that insures greater accuracy. *Patented pistol Grip with exclusive Thumb Rest gives natural comfort and positive control to bow hand for more consistent accuracy. Rare, exotic hardwoods are skillfully blended in the handle and finished to a beautiful, hand rubbed lustrous sheen. The PRO CUSTOM is truly the ultimate of refinement in artistry.

62"/29" DRAW LIMIT
66"/31" DRAW LIMIT
70"/33" DRAW LIMIT
Weights to 65 lbs. at 28"

\$79.50

PRO CUSTOM also available on special order in conventional handle as illustrated

HOYT PRO HUNTER \$65.00

A true hunting bow that is designed by hunters for hunters. The attributes of this weapon are the combined results of actual field experiences of many successful bow hunters. The PRO HUNTER'S versatile 58" length is neither too short for excessive finger pinch, nor too long for tight spots in blind or tree stand. In fact, it is the ideal compromise. Engineered to produce excellent cast with heavy hunting arrows plus perfectly balanced, synchronized low stress bow limb design to insure a longer life of accurate shooting. The draw is smooth, non-stacking . . . complimented by soft recoil action. The handle of the PRO HUNTER is semi-pistol grip with Thumb Rest feature for better hand placement. Exotic hardwood riser for both strength and beauty. Non-reflective satin rubbed finish eliminates glare. Added up, all of these features make the PRO HUNTER first choice of the serious hunter.

SPECIAL OPTION REQUESTS

Special option requests are available only on the PRO MEDALIST, PRO CUSTOM, and PRO HUNTER at a charge of \$5.00 for each option request that is non-standard as follows:

Special color of glass
Special handle woods
Special handle contour

CUSTOMIZING

For the connoisseur of fine equipment, Hoyt offers French (skip) and regular checkering on the bow grip plus intricate two and three piece inlays. Available only on the PRO MEDALIST, PRO CUSTOM, and PRO HUNTER.

Grand Deluxe Checkering* . . . \$24.50 (g)
Deluxe Checkering . . . 18.00 (g)

BOW TIP PROTECTORS

Rubber tip protector and bow string keeper for lower tip \$.50

The HOYT Precision LINE-O-SITE

• for the targeteer • for the hunter • for the instructor interested in improving technique.

The new LINE-O-SITE with anodized aluminum slide bar is self mounting with new Sure-Grip adhesive for positive attachment without unsightly screws, tape or messy cement. Yet it is easily removed without harming the finish. Nickel plated sight frame and mount has firm friction adjustment.

MODELS

Complete with sight, mount, slide bar and cement.

LS-1 LINE-O-SITE - Prism Lens (state degree) \$3.25

LS-2 LINE-O-SITE - Plain Lens \$2.75

LS-3 LINE-O-SITE - Post Sight \$1.95

LS-4 LINE-O-SITE - Peep Sight \$1.95

EXTRA PARTS

LP-5 - Prism lens, mounted in lens frame (any degree) \$2.00

LP-6 - Plain Lens, mounted in lens frame \$1.50

LP-7 - Post Sights50

LP-8 - Peep Sight50

LP-11 - Friction Sight Mount50

LP-12 - Slide bar 1.00

LP-13 - Tube Cover 3 for .05

DEFLECTION TABLE FOR PRISM SELECTION

As an aid in selecting the proper prism, the following table gives the distance a prism lens will move the sight (deflect the target image) as compared to a plain lens.

2° - 5/16" deflection	8° - 1 3/8" deflection
4° - 11/16" deflection	12° - 2 1/8" deflection

New HOYT FLEX-REST

The FLEX-REST permits an interference free escapement of the arrow due to its "spring" like action which moves out of the way. This principle makes it superior to all other forms of rests and ideally suited to either plastic vanes or feathers.

NEET ARROW REST

Felt covered peg rest on leather pad. Self sticking, easily applied. \$.50

NEET PENCIL PAC

Unique, convenient pencil holder with pencil. Self sticking, easily applied to bow or other surfaces. \$.50

NEET STRING KEEPER

Leather and plastic self sticking keeper always holds bow string neatly in place \$.50

BOW STRING SILENCER

KWICKEE - Effective molded rubber silencer. A must for every bow hunter \$.90

NATIONAL - Easily installed rubber silencer. 2 pair increases effectiveness.....\$.35

FLEX-REST is quickly and securely mounted with its self adhesive that does not harm finish when removed. R. or L. hand \$.50 Available 12 in attractive display carton.

BOW STRING SERVER

SSS - Speed Spin, with full spool of thread, adjustable tension, directions \$1.50

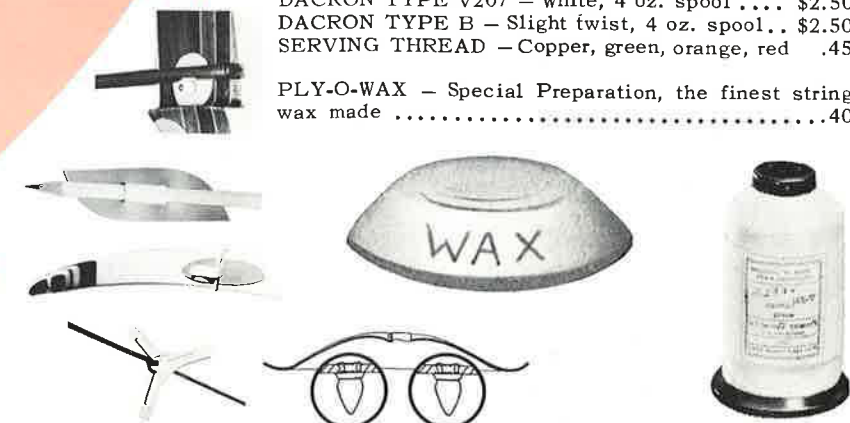

BOW STRING MATERIALS

DACRON TYPE V207 - White, 4 oz. spool \$2.50

DACRON TYPE B - Slight twist, 4 oz. spool.. \$2.50

SERVING THREAD - Copper, green, orange, red .45

PLY-O-WAX - Special Preparation, the finest string wax made \$.40

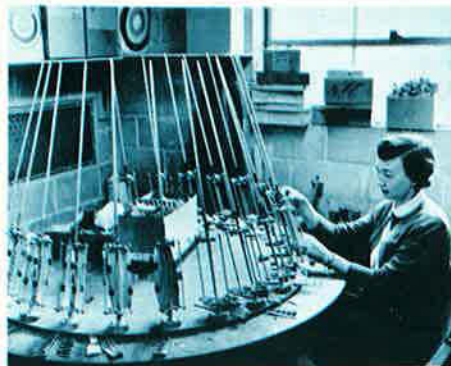

ARROWS

by HOYT

Arrows by HOYT are your assurance of quality. Built of the finest materials available on the most modern machines, arrows by HOYT receive infinite attention to every detail to make them better. Easton aluminum shafting in both 24SRT-X and XX75 is stocked in 22 diameters and wall thicknesses. The new Laminex Micro-Flites, the best in fiberglass arrow shafts, are used exclusively. Only the most select and highest quality Port Orford Cedar is used in the HOYT wooden arrow line. All grades of arrows are helical fletched (insuring accurate, non-planning flight) with selected turkey pointers on special, Patented fletching machines of our own design. With final attention being given to the arrow's glossy finish and attractive crestring, an over-all quality of superior performance is built into each arrow making the HOYT arrow the finest choice an archer can buy.

One of a battery of fletching tables where both stock and custom arrow fletchings are assembled on special, Hoyt designed, Tri-Heli-Fletchers.

ARROW RECONDITIONING SERVICE

- T1 -- Complete overhaul; straighten, refletch, recrest, renock, polish and number, target fletch \$10.00 dz. (g)

ARROW MAKING TOOLS

TRI-HELI-FLETCH

THE PRECISION 3 FEATHER FLETCHER FOR FAST, EASY FLETCHING OF STRAIGHT AND HELICAL VANES.

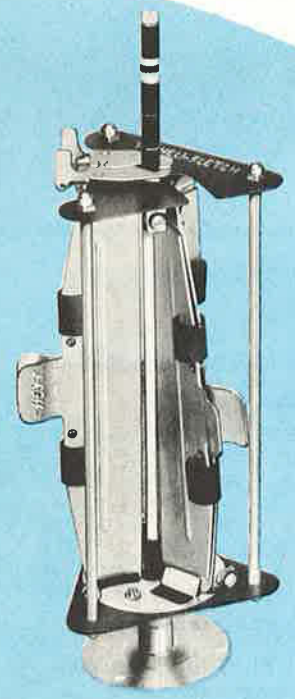

FAST— the TRI-HELI-FLETCH is speedy to operate because of automatic centering devices and smooth operating clamps. Fletches 3 vanes at once or 4 vanes (60° x 120°) and 6 vanes in two-stage operation.

EASY — the TRI-HELI-FLETCH is so easy to use because of its functional design and its versatility in adjusting to straight or right or left helical fletching.

ULTRA PRECISION — perfection of design and precision tooling makes the TRI-HELI-FLETCH a masterpiece of fletching accuracy.

Complete with one set of clamps. Clamps are available in Right Spiral, Left Spiral or Straight. State choice \$14.95
Extra clamps, per set 2.95

*PATENT NO. 2,835,208

THE TRI-HELI-FLETCH is first choice of both the manufacturer and the home-crafter. First, it is less costly because it is equivalent to 3 single feather units. Second, less space is required because 2/3 fewer units are needed. Third, high production rate due to precise and automatic centering devices. Fourth, all steel construction for durability.

SAUNDERS MATTS

Spiral machine wound of Indian Cord Grass. Vermin proof. A real arrow stopper built for long life and no rebounds.

- ARCHERY TRAINING - For camps, schools and beginners. Details of range layouts and equipment \$.10

Hoyt Pro bows are the first choice of the tournament experts who have used them to win world, national, regional, state and club championships. Ann Weber, the world's greatest woman archer, has made Hoyt Pros her first choice for years in attaining her numerous championships.

The HOYT line of bows have become the foremost in the world. They have earned a reputation of dependability and a standard of consistently high performance that is unmatched. Bow breakage over the years has been practically, less than one half of one percent—a most enviable record. In the performance category, the HOYT PROS have been the first choice of the experts in world, national and regional championships.....compiling an enviable record of wins down through the years. Also, reliability has made the Pros a preferred must of the bow hunter.

Substantiating the choice of the experts for the Hoyt line is the following impressive list of firsts that have become milestones in archery history and that have established HOYT as the leader in bow design and development:

- 1947 Pioneered the use of plastics in bow production.
- 1947 Developed the first step toward dynamic balance, equal length bow limbs.....now in almost universal use.
- 1948 Introduction of the first overdraw and semi pistol grip.

- 1951 The deflex-reflex principal of design incorporated in bow production—first radical departure from orthodox design and now used in nearly all top line bows.
- 1953 Production of the first truly short hunting bow—only 52".
- 1956 Dynamically balanced bow limbs, now *Patented, introducing a new dimension in accuracy.
- 1956 The true Pistol Grip, *Patented, was first introduced on the Pro Olympian and now has become the most popular distinctive conformation of the modern bow.
- 1957 Hoyt craftsman offered the first exquisitely customized bows..... checkering and inlays.
- 1959 Incorporation of the Thumb Rest that has improved the "feel" of the bow grip.
- 1961 And now, another Hoyt first, a break through in bow technology of the first magnitude. Torque Stabilizers (Patent Pending) that substantially increases the bows stability for an amazing gain in accuracy.

* PAT. NO. 2,995,130

HOYT BOW GUARANTEE

When registered within ten days after purchase and providing bow has not been mis-used, each Hoyt bow is guaranteed as follows:

Free repair, or replacement if repair is not feasible, will be made should failure occur during the first six months after purchase date. During the second six months, repair or replacement will be made for 25% of the list price. From 1 year to 1½ years after purchase date the charge will be 50% of list price. From 1½ years to 2 years the charge will be 75% of list price. From 2 years to 3 years the charge will be 85% of list price.

Replacement will be made with a bow of the same model or equivalent. Dealers are not authorized to make adjustments.

For the serious hunter, first choice is the Hoyt Pros which have produced excellent results in the game fields throughout the world because of their absolute dependability and top performance.
