Infinity Construction Services was founded on the principle of integrity and quality of workmanship. Infinity Construction Services is a Colorado owned Service Disabled Veteran electrical contractor meeting commercial and industrial needs across the nation. Our philosophy is derived from the life experiences of our veteran ownership and management. Infinity Construction Services is comprised of trained electricians providing expertise in electrical services spanning: new construction, tenant finish, remodel, design build, expert troubleshooting, security, and low voltage systems.

As a Small Business Enterprise (SBE) and Service Disabled Veteran Owned Small Business (SDVOSB) certified with the Veterans Administration, we are committed to the success and growth of our company and employees. For apprentices, Infinity Construction Services promotes continuous training and education through the Federally-approved Bureau of Apprenticeship and Training (BAT) program. For journeymen, Infinity Construction Services encourages class and seminar participation on the latest electrical, safety, and industry advancements when offered. Crew leaders furthermore conduct weekly safety briefings where safety protocols and new electrical codes are reviewed.

Infinity Construction Services serves a wide range of customers including public, private, and government agencies. Our list of accomplishments include work at NORAD, Fort Carson, Buckley ANG Base, Lucent Technologies, Raytheon, the Denver Coliseum, General Mail Facilities, Denver police stations, Denver and Parker fire stations, the Regional Transportation District (RTD), Denver, Aurora, Jefferson County and Brighton public schools, the historic Molly Brown House, and an assortment of projects. Our quality of work has also earned us a place on many preferred bidder lists. Moreover, Infinity Construction Services has concluded the new multi-million dollar Denver District 2 Police Station located in the City and County of Denver and the Buckley Air Force Base Civil Engineering Complex, completed in fall of 2005. Most recently, Infinity Construction Services has completed the three million dollar emergency generator system upgrade at Evans Army Community Hospital in Fort Carson. This project was extensive and was completed during operational hours. This project carried a Army Corp specification that linked us to the stringent OSHPD standards for seismic and installation practices.

Recently, Infinity worked on an FBOP medium security FCI in Hazelton, West Virginia. Our 12 million dollar scope includes all systems and controls for the project.

As a decorated veteran of the United States Army and licensed Master Electrician, Darrel Wilmoth brings over 20 years of experience in the construction industry. This includes over 10 years of commercial estimating and project management experience. He has extensive knowledge in the commercial and industrial arenas of construction. As a former member of the Associated Builders and Contractors legislative committee, Darrel actively lobbied for the construction industry traveling to Washington, D.C. to meet with local and national representatives. His eclectic experience successfully integrates all parties into a team for the success of the project.

Darrel has experience in the private sector, owning his own electrical contracting company in the Denver area for almost a decade. Other accomplishments include attaining the rank of Sergeant within two years of service and he is scheduled for degree completion in 2011 with a Bachelor of Science in Accounting. Darrel is a licensed California electrical contractor and certified disabled veteran, also holding Colorado and West Virginia licenses.
