PIPE BRASS FITTINGS

Advantages:

All pipe fitting threads are made to Dryseal standards. Connectors, unions, nuts and extruded elbows and tees are machined from CA 360 and CA 345 brass rod; forged elbows and tees are machined from CA 377 brass.

Specifications:

Meets functional requirements of the SAE, ASME and ASA.

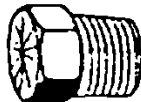

Applications:

Use with brass, copper or iron pipe. Manufactured for low and medium pressure line connection work.

Temperature and Working Pressure Ranges:

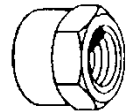

From -65° to +250°F at 1000 PSI.

TUBING TOOLS

PRECISION TUBE CUTTER

- 1/8" TO 1-1/8" precision tube cutter.
- For all copper & aluminum tubing.
- Double roller for superior cutting.

J&B #	QTY
50315	EA

QUICK OPEN FLARING TOOL

- Use on copper, brass & aluminum tubing sizes 3/16" to 5/8" OD.
- Self-Centering yoke of shock proof malleable steel.
- Makes SAE 45 degree flare joints without cracking.
- Hardened super smooth cone.
- Long handle for added leverage.
- Large wing nuts permit easy, positive locking on the tubing.

J&B #	QTY
50320	EA

COMPRESSION BRASS FITTINGS

Advantages:

No flaring, soldering or other preparation of tubing necessary to assemble. This economical fitting is readily available in broad selection of styles. Manufactured from CA 360, CA 345, or CA 377 brass rod.

Specifications:

Listed with Underwriter's Laboratories for flammable liquid. Compression fittings meet functional requirements of SAE J-512, ASA and ASME.

Applications:

Use with copper, brass and aluminum. Not recommended for steel tubing. Manufactured for low and medium pressure tubing connection work where excessive vibration or tube movement is not involved. Use long nut for additional vibration resistance.

Working Pressure Ranges:

Temperature and type of tubing used are important factors; however, the following table is a good guide for proper selection. Temperature 73°F:

PSI	TUBE O.D. (in.)	PSI	TUBE O.D. (in.)
400	1/8	200	3/8
400	3/16	200	1/2
300	1/4	150	5/8
300	5/16	100	3/4

Temperature Ranges:

From -65° to +250°F

AIR BRAKE FITTINGS

FOR COPPER TUBING

Advantages:

Easy to assemble, no flaring required. Extruded from CA 360 or CA 345 brass.

Specifications:

AB fittings will meet DOT FMVSS571.106 air brake specifications when assembled with 63NTA tube support and J844 nylon tubing.

Applications:

Use with copper tubing in air brake systems. Bodies (with addition of NTA tube support) are interchangeable with NTA bodies for use with SAE J844 nylon tubing.

Working Pressure Ranges:

Up to 400 PSI.

Temperature Ranges:

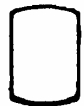

Fittings will withstand variations from -65° to +250°F.

NYLON (AIR BRAKE) TUBING

PARFLEX TUBING:

Nylon tubing designed for use in tractor, trailer and other mobile air brake, fuel, instrumentation and air accessory systems. Meets SAE J844 Type A or B and performance requirements as specified in SAE J1131.

- 100% quality controlled - 100% pressure tested.
- Saves weight and labor in comparison with copper tubing.
- Heat and light stabilized.

TYPE A TUBING

Single wall extruded type 11 nylon tubing.

Temperature Range: 40°F to +200°F
(-40°C to +93°C).

Maximum Working Pressure: 150 PSI.

Meets Dot FMVSS 106 (Size 2 not listed in FMVSS 106).

J&B #	PARKER #	TUBE O.D.	MIN. BEND RADIUS	QTY
50502	1120-2A	1/8	3/8	100'

50504	1120-4A	1/4	1	100'
50505	1120-5A	5/16	1-1/4	100'

TYPE B REINFORCED TUBING

Seamless extruded nylon 11 core reinforced with one open ply of fibrous reinforcement and a protective nylon 11 cover sheath. The outer cover and core are fused to minimize leakage and maximize impact resistance and are always of contrasting colors.

Temperature Range: -40°F to +200°F.
(-40°C to 93°C).

Maximum Working Pressure: 150 PSI.

Meets Dot FMVSS 106.

NYLON (AIR BRAKE) TUBING

COLORED TUBING

PARFLEX TUBING:

Nylon tubing designed for use in tractor, trailer and other mobile air brake, fuel, instrumentation and air accessory systems. Meets SAE J844 Type A or B and performance requirements as specified in SAE J1131.

- 100% quality controlled - 100% pressure tested.
- Saves weight and labor in comparison with copper tubing.
- Heat and light stabilized.

TYPE B REINFORCED TUBING

Seamless extruded nylon 11 core reinforced with one open ply of fibrous reinforcement and a protective nylon 11 cover sheath. The outer cover and core are fused to minimize leakage and maximize impact resistance and are always of contrasting colors.

Temperature Range: -40°F to +200°F.
(-40°C to 93°C).

Maximum Working Pressure: 150 PSI.

Meets Dot FMVSS 106.

NYLON TUBING

HIGH QUALITY NYLON 11 TUBING

Not D.O.T. Approved

- For applications requiring low density, lightweight toughness, flexibility and chemical resistance.
- Suitable for pneumatics, gasoline and diesel fuel.
- UV stabilized.
- Hardness = 78 Rockwell R.
- Vacuum rating: To 28" Hg.

Temperature Range:

-60 °F to +200°F
(-51°C to +93°C).

Working Pressure:

4 to 1 Safety Factor

Compliance:

Not D.O.T. approved
Meets UL94HB

NTA BRASS FITTINGS

NTA Advantages:

Meets D.O.T. FMVSS 571.106 air brake specifications. Utilizes ribbed sleeve for compression and positive grip. Features built-in stainless steel inserts for extra strength in compression.

No Special Tools Needed:

You can assemble tubing to NTA fittings, no need to flare. Machined from CA 360, CA 345 or CA 377 brass.

Specifications:

Meets functional requirements of the SAE automotive tube fitting standards: SAE J246 and SAE J1131.

Applications:

Use with SAE J844 Type A and B nylon tubing in air brake systems or in cab air controls.

Working Pressure Ranges:

Up to 150 PSI.

Temperature Ranges:

Fittings will withstand variations from -40° to +200 F

PRESTOLOK FITTINGS

Advantages:

- Compact one piece brass fitting for use with polyethylene, nylon or soft metal tubing.
- This fitting is specially designed for low pressure circuits where fast assembly, disassembly and reassembly is important.
- No special tools are needed for assembly; just insert the tubing into the fitting until it bottoms.
- Radial claws on the metal grab ring grip the tubing securely to provide retention.
- Prestolok can be assembled and disassembled repeatedly without impairing its ability to seal.

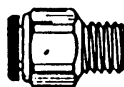

Applications:

Prestolok is designed to conduct air, water, oil and inert gases. Prestolok is ideal for use in pneumatic instrumentation circuits and many industrial applications. All applications should be carefully tested through the range of conditions which may be encountered prior to use.

Working Pressure and Temperature Ranges:

Zero to 150°F at up to 285 psi. Vacuum applications are dependent upon temperature and type of tubing being used.

PRESTOMATIC FITTINGS

AIR BRAKE PUSH-IN FITTINGS

Advantages:

- Sizes 5/32" and above meet D.O.T. FMVSS 571.106 air brake performance specifications
- No special tools are needed to assemble. Just bottom the tubing in the fitting body for a positive seal.
- Stainless steel tube support in sizes 1/4" and above assures maximum flow and performance requirements of SAE J1131.
- Lubricated o-ring seal (Buna N) insures a quick, easy and positive seal.
- Innovative collet design insures positive grip on tubing.
- Release button offers quick and easy disconnections.

Applications:

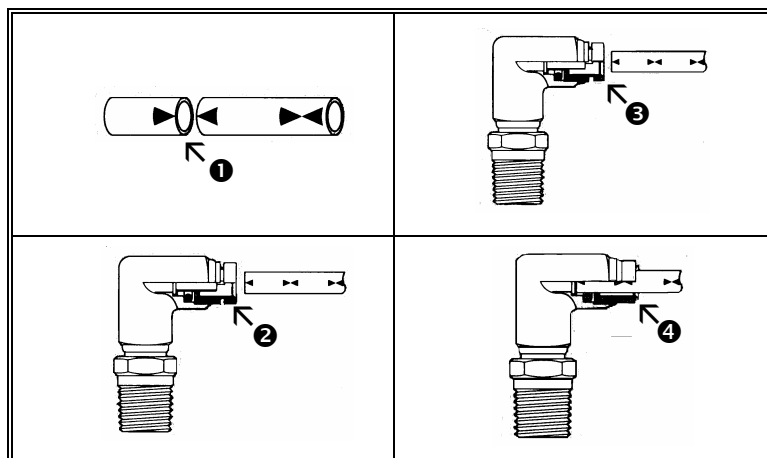

- Designed for all D.O.T. truck and trailer applications.
- Consult the factory with any questions regarding special product applications.

Technical Data:

- Working pressure from 27in. Hg vacuum to 250 psi.
- Working temperature from -40°F to +200°F.

ASSEMBLY INSTRUCTIONS:

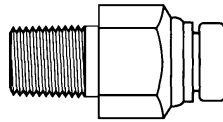

1. Cut Parker Parflex J844 tubing squarely with Parker tube cutter PTC-001. Be certain the port or mating part is clean and free of debris.
2. Insert tubing into fitting until it bottoms. Pull on tubing to verify it is properly retained in the fitting.
3. To disassemble, simply hold release button against the body and remove tubing.
4. To reassemble, lubricate leading end of the tubing with light oil or petroleum jelly.

AIR BRAKE HOSE

LOW PRESSURE

AIR BRAKE HOSE CAN BE USED WITH THE AIR BRAKE FITTINGS ON PAGE 679.

Application:

Air Brake Hose Lines

- Designed for conveying air in truck and industrial trailer brake systems.
- This hose is certified to meet SAE J1402A and D.O.T. FMVSS 106 requirements.
- Temperature resistance -40F to +200F. Cover = EPDM, RMA Class C.
- The synthetic oil resistant tube & cover with a four spiral polyester reinforcement makes it virtually kink-proof and keeps it flexible even in extreme temperatures.

Construction:

- *Outer Cover* - Synthetic compound; resistant to oil, grease, abrasion, ozone and sunlight.
- *Reinforcement* - Duct piles of synthetic fiber.
- *Inner Tube* - Synthetic compound, resistant to gasoline, grease and other petroleum products, common hydraulic fluid, air and water.

J&B #	HOSE O.D.	HOSE I.D.	QTY
* 38684	3/4"	3/8"	50 FT.
* 38685	7/8"	1/2"	50 FT.

* No broken boxes

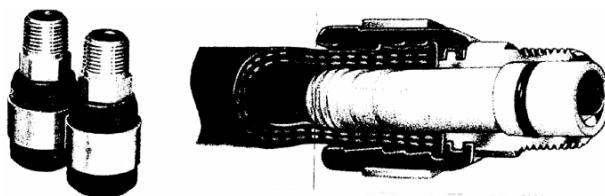

REUSABLE HOSE ENDS-AIR BRAKE

AIR BRAKE HOSE END KITS

- Meets the requirements of DOT 106 and SAE J1402
- Swivel Ends reduce residual torque in hose for longer life – No need to disconnect both ends to service the brake system.
- Components in contact with the air are made of corrosion resistant brass and nylon to improve air system life.

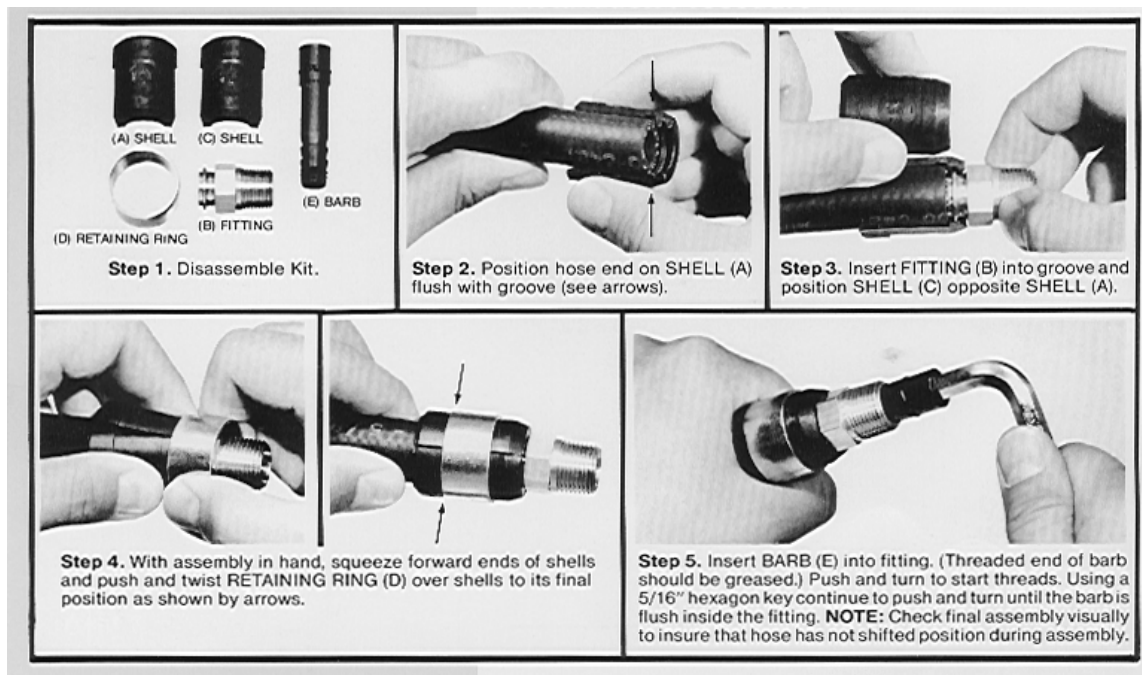

Kit

31403	Two End Fittings Per Kit	3/8	1/2	1

* Kits not available for 1/2 I.D. hose.

REUSABLE HOSE ENDS-AIR BRAKE

Advantages:

Easy to assemble and disassemble. Extruded from CA360 or CA345 brass. Sleeves are made from CA274 brass.

Specifications:

Air brake hose ends will meet D.O.T. FMVSS571.106 standards when used with SAE J1402 air brake hose.

Working Pressure Ranges:

Up to 125 PSI.

Applications:

Air brake hose connections.

Temperature Ranges:

-40°F to +120°F.

SAE 45° FLARE BRASS FITTINGS

Advantages:

This economical fitting resists mechanical pullout. Can be assembled and disassembled repeatedly. Manufactured from CA 360, CA 345 or CA 377 brass.

Specifications:

Listed with Underwriter's Laboratories for flammable liquid, marine, refrigeration and gas applications. Meets functional requirements of SAE, ASA, ASME and MS (Military Standards).

Applications:

Use with copper, brass, aluminum and welded steel hydraulic tubing that can be flared. Manufactured especially for hard-to-hold liquids and gases.

Working Pressure Ranges:

Temperature and type of tubing used are important factors. However, the following table is a good guide for proper selection. Temperature 73°F with copper tubing:

PSI	TUBE O.D. (in.)	PSI	TUBE O.D. (in.)
2800	1/8	1000	3/8
1900	3/16	750	1/2
1400	1/4	650	5/8
1200	5/16	550	3/4

Temperature Ranges:

From -65° to +250°F.

Vibration:

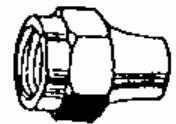

Short nut may be used when vibration is minimal. The long nut offers additional vibration capacity.

BRAKE LINES

HYDRAULIC STEEL BRAKE LINES

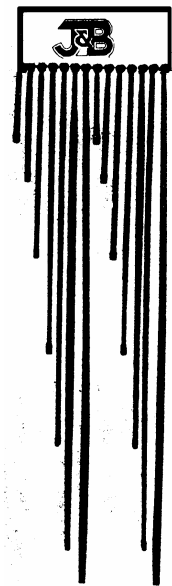

- Have been developed and manufactured to meet or exceed the following automotive and SAE specifications: SAE-527b, SAE J-533b, M.S. 1806 and GM 123.
- These lines resist corrosion, vibration, fatigue and shocks from impact.
- They provide increased protection and pressures greater than the most forceful braking applications.
- These brake lines are made by double wrapping a copper coated steel strip to form a double walled tube. Then the copper/steel tube is furnace-fused into one continuous, seamless line.
- Corrosion protection is provided by a lead/tin compound (ternecoat) coating.

ASSORTMENT AND RACK

J&B #	DESCRIPTION
38442	Brake Line Rack - Metric
2099	Brake Line Assortment - Rack plus one each of all metric sizes

BALL VALVES

Advantages:

- Parker's CA377 forged brass body and bronze body ball valves provides extended service life and resists failure caused by severe temperature applications.
- Optimum flow design assures maximum system efficiency.
- Highly inert teflon seats and seals allow ease of opening and closing, plus the advantage of resistance to chemical corrosion.
- Parker also provides a blow-out proof stem and a specially designed handle enabling easier turning leverage.

Applications: (Brass)

Fuel line shutoff for gasoline and diesel powered over the highway, off highway, and construction equipment vehicles.

Water and air service lines on capital equipment and plant design plumbing that requires total shutoff ability.

Applications: (Bronze)

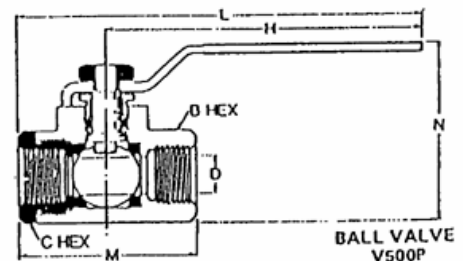

Water and air service lines on capital equipment and plant design plumbing that requires total shutoff ability.

Operating Instructions:

Quarter turn is "ON" or "OFF". (Provides positive stop action for maximum flow and full shutoff.)

Working Pressure:

600 PSI W.O.G. 150 PSI Saturated Steam

TRUCK VALVES

Advantages:

Parker truck valves have metal-to-metal seats with fine-thread screwdown. This enables positive sealing up to the capacity of the valve.

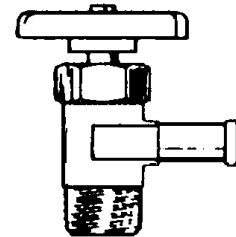

Working Pressure Ranges:

Valves are designed to withstand up to 150 PSI working pressure.

VALVES

Applications:

Manufactured for use with low pressure air, water, gas and certain other fluids.

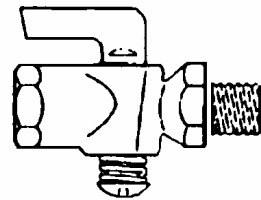

Working Pressure Ranges:

System temperature and the type of tubing used should be considered. Ground plug shutoffs are designed to withstand 30 PSI working pressure. Drain cocks are designed to withstand 150 PSI working pressure, except where noted.

39280	1/4	EA

HOOD RELEASE AND CHOKE WIRE STOP

J&B #	QTY
52802	10

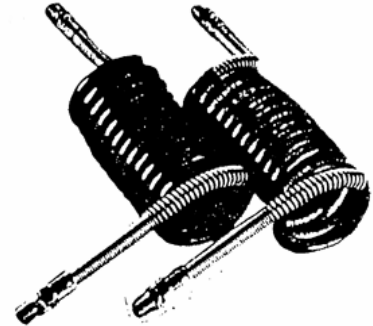

BrakeCoil™

Tractor to Trailer Coiled Nylon Air-Brake Connections

You get it all with Parker BrakeCoil - designed for just about any tractor/trailer air-brake application you will need for trouble free service on your rig.

- Heavy-duty cadmium plated spring guards that are rust resistant for added protection.
- More coils offer you maximum working lengths.
- No need for pogo sticks or spring hangers.
- Color coding gives you mistake-free hook-ups: blue for service, red for emergency.
- Temperature range: -40°F to +200°F.

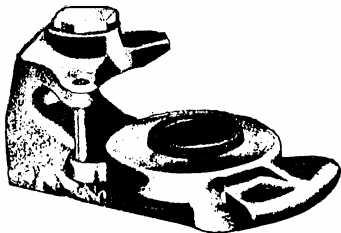

BrakeCoil kits are supplied complete - Parker preassembled. Everything needed including spring guards and male pipe end NTA fittings ready to install. No cutting or assembly necessary. Just attach the gladhand to either end. A kit consists of both a red and blue tube assembly.

J&B #	PARKER #	TUBE O.D.	VALVE TAIL LENGTH	MALE ENDS		WORKING LENGTH	APPLICATION
				VALVE	GLADHAND		
52570	731516	1/2	12"	1/2	1/2	15'	Tractor to Trailer

GLADHAND COUPLINGS

- Die cast aluminum body.
- Conforms to SAE J318.
- Connects to 1/2" pipe.

J&B #	QTY
21669	EA

GLADHAND SEAL

- Air coupling seals all trucks using air brakes.

J&B #	QTY
21476	25
