

Dry Ice (CO₂) Cleaning Services

Industry Applications

- Castings
- Circuit Boards
- Ducts
- Food Processing Equipment
- Generators
- Historical Restoration
- Incinerator Fans
- Landing Gear
- Mold Remediation
- Molds
- Motors-Winding and armature
- Ovens
- Painting Systems
- Printing Presses
- Transformers

The eco-friendly process has been approved by the EPA, FDA and USDA.

PSI Industrial Solutions specializes in Dry Ice cleaning solutions when pressure washing, high-pressure waterblasting and chemical cleaning methods cannot be employed.

Our in-place cleaning system utilizes compressed air to accelerate dry ice pellets to a high velocity, which creates a micro-thermal shock to clean glue, paint, food, rubber, mold and dirt from most substrates. Dry ice instantly vaporizes upon impact leaving only the residue from the surface to be disposed of.

Dry ice pellets are non-abrasive and non-conductive, allowing the ice to be utilized in and around electrical components.

Applicable Industries:

Chemical Processing, Ethanol, Food & Beverage, Ethanol, Manufacturing, Municipal, Primary Metals including Foundries, Pharmaceuticals, Pulp & Paper, and Power Generation industries
