

Automotive Technology Cooling System Criss-Cross

Name _____ Date _____ Period _____

Across

1. Coolant flows through these to and from the radiator
6. Pulls air through the radiator
7. Regulates engine temperature
9. Holds pressure in the cooling system
11. The most common problem with the cooling system
12. Holds the hose from coming off
13. Tells the computer the engine temperature
14. tool used to check for leaks
15. Green or other colored fluid
16. pushes coolant into the motor

Down

1. in the dash, providing warmth
2. Tells us how hot/cold the engine is
3. Keeps air from the fan directed through the radiator
4. coolant passages around the head and block
5. Where heated coolant is cooled off
8. Rubber that drives water pump
10. What we do when the coolant is dirty
