

Radiating Pain

Testimonial

Patient: Thomas (Last name not given for privacy)

Sex: Male

Age: 48

Thomas started seeing Chiropractors at age 16. Before starting Chiropractic Care he would suffer from severe migraines. Sometimes he would have several a week. Thomas started his migraines after suffering a neck injury playing football. His family went the medical route initially and they were not able to find the answers or the pain relief that they were looking for. Finally they found their answer with Chiropractic care!

“My Life was changed by Chiropractic. After several adjustments to my neck my migraines diminished to the point where now I suffer from them 1 to 2 times a year. I was getting them weekly. I have been adjusted at least weekly since I was 16 to make sure that I am working at my optimal potential. I was so impressed at how my Chiropractor was able to help me, I decided to become a Chiropractor myself”

Referring your friends and family, and trusting us with those that you love, is the nicest compliment possible!
