WATERTRONICS™
A LINDSAY COMPANY

WHY WATERTRONICS

KEY DIFFERENTIATORS THAT MATTER

For more than 30 years, Watertronics, a Lindsay Company, has been designing and manufacturing custom pumping solutions for the Golf, Landscape, Municipal, and Agriculture markets. It is our mission to provide the most reliable pumping systems available.

Our engineering expertise and advanced software applications have distinguished our pumping systems as the industry standard for reliability, ease of use and energy efficiency.

COMPREHENSIVE FACTORY PERFORMANCE TESTING

Testing at full flow, vibration, and pressure settings ensure any problems occur at the factory, not at the job site.

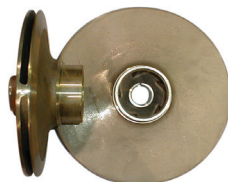

Test data documentation is provided with every pump station for peace of mind and optimal service support.

STATE-OF-THE-ART MANUFACTURING FACILITY

Best-in-class fabrication processes that create quality and durability

Offering precision trimmed impellers to match specific performance desired

Multi-staged epoxy coat finish that stands the test of time

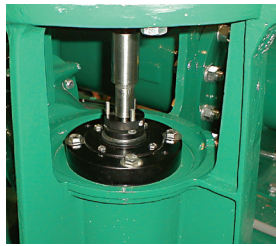

Rolled edge steel construction for weld-free corners that resist rust and corrosion

INHERENT DURABILITY BY DESIGN & CUSTOM ENGINEERING

Watertronics patented Electronic Butterfly Valve (EBV) regulates pressure, eliminates surges and check valve slam, and prevents motor overload.

Provides 100% pressure regulation back up in case of VFD fault.

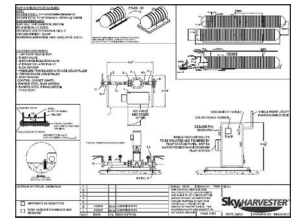

Leak free mechanical seals protect your investment.

Reduces maintenance and eliminates premature shaft wear.

Schedule 40 steel piping with Victaulic coupling for strong, versatile piping connection.

Providing over 1,000 pre-sale design drawings between Landscape and Golf annually, our Applications Engineering staff offer unmatched support to all layers of the industry.

Watervision® remote monitoring technology provides you the flexibility to monitor and control your pump system from any web-enabled device. Receive alerts directly to your phone for alarm conditions, water level, and pump status. Monitor power consumption, water usage, and more to optimize the performance of your Watertronics pump station.

100% WARRANTY COVERAGE

Watertronics provides a one-year warranty for all parts, components, and labor with a certified PSN Service Partner.

SINGLE-POINT RESPONSIBILITY

WATERTRONICS IS...

- The only Manufacturer currently building pump stations to FCC Compliance standards.
- Leading the charge in water-efficiency through optimized and advanced control algorithms.
- A UL-Listed 508 Panel Shop
- Supporting 7000 pump station installations worldwide with over 200 factory-trained and certified PSN Service Partners.
