

EVOLVING *Pictures*

Evolving Pictures Entertainment has a very privileged and sophisticated way of financially participating in an array of Intellectual Properties, and Commercial Entities, which unlike stocks, commodities, currencies, mutual funds, hedge funds, oil & gas investment, or other correlated assets, can in certain instances provide a 50-200% ROI prior to generating revenues, that has full transparency, and has zero quantitative, exotic, or other confusing financial models.

Our EPE Team Partners are setting the stage in educating interested investors, money managers, financial advisers, hedge fund managers, and private equity groups on why investing in a Multimedia and Technology Business is really an investment into a Manufacturing and Distribution Company. Internet Technologies and Media Entertainment are the number one exports of the United States, have a proven track record, and can offer potential investors in the United States and globally a 100% transparent and risk minimized option where there is no guessing. There aren't many alternative investments that can offer tax incentives, multiple exit strategies, as well as giving back to the local economy, while also being involved with the Technology, Multimedia and Entertainment industries.

Evolving Pictures Entertainment has Motion Picture, Television, Internet Communications, Sports Entertainment, and numerous other Commercial Entities currently in various stages of Development and Production.

Because of **Evolving Pictures Entertainment's** innovative technologies, potential for rapid growth, well-developed business model, impressive management team, and diversification, we are honored to be in a position to reward and celebrate our **family and close friends**, and also welcome aboard a few non-affiliated, savvy individuals that share our vision.

Timing is everything; make our success yours!
