

Duval Update
08/01/18

Duval reports they will be closing on Las Casitas the week of August 6.

When they start development, they will expand PP1 and 2, lower the pipe at the weir to where it should have been in 1989 and construct a berm behind San Diego.

PP3 is being put in service so the agreed upon conveyance cannot take place until both PP1 and PP2 are expanded.

Surfview at Matanzas was held up by a pipe issue not noticed by the engineers. Construction should resume shortly.

The Las Casitas models have been on our web page for some time. Please check them out if you haven't already

No further word on Richmond Homes and Las Logos. Those models are also on the web page.

Updates will be sent to the Parcel Presidents.
