SSEP Mission

The goal of SSEP is to improve pregnancy outcomes and long-term quality of life for women with diabetes and their offspring, which extend beyond birth for both mother and child.

We work with provider groups to increase their knowledge and delivery of care by:

- 1) Developing and/or endorsing events and activities that increase their knowledge.
- 2) Supporting multidisciplinary health care teams as they take a proactive approach, focused on healthy lifestyles.
- 3) Encouraging providers to involve the entire health care system, community and patient at all levels in supporting lifestyle changes that foster improved long-term health and quality of life.

What we do

SSEP promotes the California Sweet Success model of care by making it available and accessible to diabetes and pregnancy programs nationwide.

This progressive model of care provides current diabetes and pregnancy guidelines that have been successfully implemented in various settings including managed care, primary care, clinics, offices, medical centers and hospitals at all levels of care in numerous states, and at Indian Health Service facilities.

SSEP also develops education materials, assisting in conference development and providing support services for health care providers nationwide. Education materials focus on the long-term health of the mother and her family in the preconception, pregnancy, postpartum and interconception periods.

Who are members

SSEP Individual Members are professionals or students in nursing, social work, nutrition and many medical specialty fields. Organizational Members are health care maintenance organizations, hospitals, clinics and schools.
