Stop Cracking on your digitally printed material!

Shark Finishing Machinery introduces to its Smart line of print finishing equipment Digital Creasers / Perforators. These machine will eliminate your digital cracking once and for all. They feed up to a maximum sheet width of 14.5" and perform up to 32 creases or perforations per sheet. Our creasers offer precise creasing every time and are easy to set up and very user friendly. They feature easy to replace front-loading interchangeable creasing & perforating dies, simple to operate LCD touchscreen controls, and up to 99 jobs can be stored into their long-term memory. These machines would be a great addition to any digital shop.

- Variable speed
- Up to 32 creases / perforations per sheet
- Up to 99 Program Memory
- Precise Creasing Accuracy
- Sheet length detector
- Emergency stop button for added security
- Allows for creasing depth adjustment
- Crease digital stock without cracking
- Creasing & Perforating
- LCD Touch Screen Display
