So you've decided to  
become a "Little Farmer?"  
Great, let's talk chickens.  
We created healthy feeds to  
get you started, go non GMO  
or economy, have fun with-  
treats and keep your coop  
fresh. We created what you  
need, so you won't have to  
peck around looking for  
them!

We started our Little Farmer  
Products business as Flying C  
Promotions named after the happy  
memory of a childhood feedstore. Those  
trips to the feed store, became feed  
purchases for 4-H, then feed deliveries for  
our little farm. Well to pay those feed bills  
we searched out and sold many of the best  
products, now it's our privilege to make  
some and share them with you...another  
Little farmer!

Encourage your chickens to **EXERCISE** while they enjoy a healthy scratch treat. Not only will your flock *Love* the mealworms, but the additional protein they get will increase their energy which helps with egg production. We also use whole grains for maximum nutritional value.

OR, choose a **NON GMO** scratch made with farm raised whole grains that are loaded with vitamins and minerals naturally. Our protein packed blend of peas, wheat, oats and barley will help maximize your pellet or crumble mix to stretch your dollar, while offering additional protein to keep your free range flock laying healthy eggs!

# ROOSTER'S TRUE GRIT!

Poultry Grit with a Purpose, Granite for digestion, Food Grade Diatomaceous Earth as a Natural DeWormer, REDMOND® Brand Clay Products with Minerals & Limestone for shell integrity, because Rooster says his hens need it!

Chickens **DON'T** have teeth. They pick up stones that go to the gizzard. The stones act as a grinder, to aid in digestion. We've picked out the perfect size grit mixed with Diatomaceous Earth and Redmond Conditioner for a healthy digestive system. Free feed in a separate dish or sprinkle on the ground.

**NOTE TO LITTLE FARMER BEGINNERS!** Your laying hens won't need a rooster to produce eggs, they just won't be fertile which only matters if you wish to hatch or incubate your eggs. **ALL EGGS** inside are based on what a chicken eats, so good chicken nutrition equals good eggs! Always provide clean water and have fun!
