

10. Change to the Quality of Life for the Whole Community

- Why does the City Government want the public to believe the Crossings Specific Plan project is needed?
 - Due to some undefined altruistic requirement of providing new housing for some group that has a right to live in Fountain Valley?
 - To help the Crossings area property owners who the City think are not able to look out for their best interests and have been reluctant from making the changes the City wants them to make to their properties in the past?
- The City wants every resident and business/property owner to believe that the whole community will reap benefits for the Crossings.
 - While some may benefit, a great many will suffer a loss in their quality of life/business.
 - Why does the City give a higher priority to offering space and services to new residents/businesses/land owners over the rights and quality of life of current residents/businesses/land owners?
