

Collage Class

2 half day class

You may use our designs or we will enlarge your choice.

We will provide the *base* fabric to create your collage.

You need to provide:

- The background – *fabric behind the collage*. You might want to bring a few choices so that you can audition the applique on the background. You can use a pieced background if you choose. *Our technique requires that the background be quilted before the applique is applied. We will discuss this in the first class. We have fabrics for you to purchase that would work. We will also quilt it for you, if you like.*
- The fabric for the back of the quilt, or we can provide a muslin backing.
- Fabric with flowers, leaves, objects, etc. A good variety is needed, but you don't need a lot of any one fabric. You might also have one great fabric that has many images that would work, like a paisley design or a floral. *There will be some images available in class – to supplement your choices.*
- We will be using **steam-a-seam 2** fusible for the class. If you have it, bring it to class. We can provide it for \$3.75 per yard. Depending on the size of your collage, you will need 3 or 4 yards (it's 12" wide). *No other fusible, please.*
- Blenders - Also required are a few fabrics that you will use behind the cut applique pieces. They should be an overall pattern or a fabric that will blend with your chosen color pallet. Think of it as the color that will peek through between the applique pieces.

This is a fun and relaxing class.
