

Luke Skywalker Saves the Planet of Tatooine

Luke Skywalker needs some lightsabers to help save the planet of Tatooine.

Josh, Jack, and BB8 want to help Luke Skywalker.

There are 7 lightsabers behind the secret wall.

Roll the dice to find out how many lightsabers that they take to Luke Skywalker to save the planet of Tatooine.

- Record what happens: $7 - 3$ makes 4 lightsabers left behind the wall.
- Prove it! $7 - 3 = 4$ because $4 + 3 = 7$
