## NOTICE OF ANNUAL FIRE HYDRANT FLUSHING

Annual fire hydrant flushing will begin **October 5, 2020** and continue for the week until all 71 fire hydrants in the Towns of Harpers Ferry and Bolivar are flushed. The reason we do this is to clean out our water mains for any possible sediment that can build over time. It may cause some air in your water lines and some cloudy water (which is basically trapped air bubbles). This will clear up quickly. Just run your faucet until it clears up. If it does not clear up by the next day, please call Harpers Ferry Water Works and we will address the problem. Sometimes air gets locked up in the mains and requires more flushing of the fire hydrants.

Thank you,

Chris Styer  
Water Chief Operator Superintendent
