FORCE ON FORCE ACTIVE SHOOTER TRAINING

There is no substitute for real world scenario based dynamic interpersonal use of force training. This level of training is designed teach new officers and/or to test existing officer response to an active shooter situation, using Simunition FX law enforcement training products, under the guidance of certified instructors.

TRAINING AT YOUR LOCATION

We bring the training to your location. We supply the Instructors, FX Glock pistols, ammunition and the required safety equipment. This eliminates the high costs associated with time, travel and lodging at a remote facility, and then having to apply the lessons learned back on site.

SAFE TRAINING ENVIRONMENT

Simunition force on force FX training ammunition is now available in a reduced energy non-marking projectile format, as well as a self contained non-projectile Securi-Blank format thus allowing training to be conducted in a school or corporate environment without the risk of property damage.

This training is both physically and mentally demanding and is offered exclusively to Law Enforcement, Military and Security personnel only.

Please contact Lloyd Goodnow for pricing and availability.
