- 2). Purpose:   \_\_\_  To install a new driveway, with culvert.  
                  \_\_\_  To install a new driveway, without a culvert.  
                  \_\_\_  Or add a new culvert to existing driveway.  
                  \_\_\_  Or replace existing culvert at driveway.

Minimum culvert size - see the following:

All driveway pipe installed in Brady Township, County of Butler, Commonwealth of Pennsylvania, during the year 2018, shall be a minimum of 15" X 20' unless deemed otherwise that a pipe of a different size is required by a Board of Supervisors - Roadmaster, and that the driveway be graded properly with a negative pitch to approximately ten feet from the right of way; and anywhere water comes down a driveway and runs across a township road.

All driveways must avert water away from township roads at the landowner's expense. It is the responsibility of the landowner to correct any problem at his/her expense, including the purchase of a Driveway Permit.
