

AMP HOUR METER/ PUMP CONTROLLER

Model: AH-PMP1DA

Panel mount ¼ DIN case 100mm W x 100mm H x 120mm D (Approx. 4" x 4" x 4 ¾").

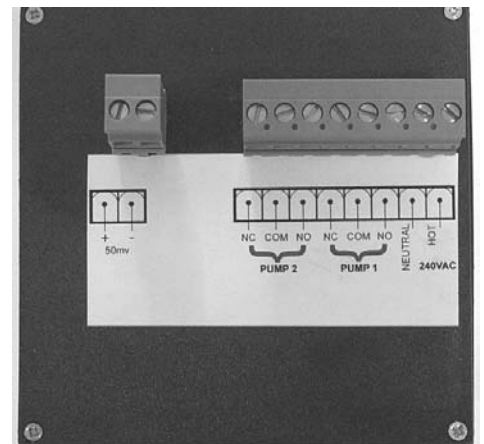

Standard Amp/Hour Totalizer & Controller Features:

- ◆ 12 digit **resettable** cumulative amp/hour total.
- ◆ 12 digit **non-resettable** cumulative amp/hour total.
- ◆ Supports rectifier shunt sizes from 5A to 3000A @ 50, 60, 100mV.
- ◆ No dip-switches or pots! All menu driven with no look up charts!
- ◆ Backlit display for low light levels.
- ◆ Small in size: All plastic to resist even the harshest environment.
- ◆ **No batteries to replace!** Permanent memory, no battery back up needed.
- ◆ Simple wiring reduces installation time and cost.
- ◆ 230VAC optional.

Additional Features for Controllers:

- ◆ Fused relays: up to 5 amps at 120vac.
- ◆ **Controls 2 pumps: (with pump prime feature!)**
 - Two presets! 6 digits
 - Two remaining counters! 6 digits
 - Two timers! Up to 999999 seconds
 - Two timer remaining counters! 6 digits
 - Two cycle counters! Count total additions

WARNING: All board components and circuitry are common to mV signal and must remain isolated from all other circuits and grounds. This is only an issue if board is removed outside protective casing.
