PRO FOLIAR FEED BACK LOOP PLANT SPRAY RECIPES

MIX AMOUNTS INTO ONE GALLON OF WATER (3.78L), PPM IS 500 TDS SCALE

To grow your plants large quickly you can create a nutrient feedback loop. Mix the following Vegetative or Flowering spray formulas. Spray all plant surfaces with a fine mist one hour before the first daily root feeding. Increasing the salt content in the leaf before feeding the roots pulls more nutrients and water up through the plants making them grow healthier, bigger and much faster.

	GRO TERRA or AQUA	BLOOM TERRA or AQUA	ULTIMATE THRIVE	ENORMOUS	MASSIVE
Thru Vegetative Stage	1/4 TSP		1/4 TSP	1/4 TSP	1/4 TSP
WKS 1&2 Flowering		1/4 TSP	1/4 TSP	1/4 TSP	1/4 TSP
