

## Script #7

Good evening trustees, my name is . I am the parent of a sophomore.

I am submitting into the public record facts relative to wireless radiation and the health of the students and teachers.

I am sharing with you primary source news in the form of YouTube videos. Parents, teachers, and students are going before school boards to have the wireless radiation removed.

The first is a video of public comments at a New York State school district, titled "Wi-Fi In Classroom Liability Notice Served To New York School District". The commenter states to the board members: "Each of you become personally liable for not dismantling the OCSD's Wi-Fi system." "Ignoring the documented information and statements and proceeding with the use of Wi-Fi routers in the schools, you are committing willful blindness and can be held liable for child negligence or possibly even negligent endangerment of a child, which carries with it criminal law repercussion if any student gets injured from the school's Wi-Fi system and a parent decides to press charges. This document establishes that you have been warned. This notice lays the legal groundwork for any parent in the future whose child gets harmed from the schools Wi-Fi system to take legal action, civil or criminal."

From the same school district is a video titled "'Remove the Wi-Fi from Classrooms' States the Phoenicia PTA". An accompanying letter to the board cites: "possible disruptions to cell growth and brain function, possible effects on fertility, cardiac function and cancers."

The school district trustee states: "It would be in our students best interest if we disable the Wi-Fi at this time."

From the same school district is the testimony of a 6<sup>th</sup> grader who gets "headaches and chest pains in school" around Wi-Fi. As you have been provided the information and as you will remember LAUSD teacher Anura Lawson testifying before the technology committee that the students were bleeding from the ears and nose in the wireless classroom.

Rhode Island math teacher Shelley McDonald states in public comments: "parents need to know about the health risks; inform staff of risks; you've ignored or sidestepped our concerns, you've tried to intimidate and deflect our criticisms." In her statement to the school board, McDonald said she thinks she was being recommended for termination because "she regularly advocates against Wi-Fi, for the health and well-being of herself and others in the building."

Trustees, over the past two years you have been provided the science, statements of experts, evidence and laws.

Please immediately provide full disclosure of this information to parents, teachers and students. Please immediately put in place health curriculum to advise students and teachers on how to avoid RF-radiation exposure. Lastly, no one wants to have students or teachers hurt from exposure to microwave radiation or to have to file legal claims against you for willful blindness, please hardwire the school technology and let's move forward.
