**CAROLINA UNDERGROUND SOLUTIONS GROWING
Carolina Underground Solutions Awarded Project for Fort Rucker**

Greenville, SC (August 28, 2017) – [CAROLINA UNDERGROUND SOLUTIONS] CUS, a leading underground telecommunications cabling and conduit contractor, announced continued growth and entry into the government sector by being awarded a project for Fort Rucker in Alabama.

CUS will provide outside plant (OSP) services as well installing NEMA boxes, core drilling and installing 2” and 4” EMT conduit pathways to facilitate fiber delivery to communications rooms throughout the base and provide for future growth. These services will be provided for more than 20 buildings on base, to include, aircraft hangers, medical facilities, maintenance shops and various other government buildings.

“Since acquiring CUS earlier this year, we have been working on implementing an aggressive growth plan, since CUS is a veteran-owned business, this strategy includes entering the government sector,” stated Braddock Cunningham, President. Cunningham further added, “this project also marks a geographical expansion into the southeast for CUS as we work to make the Greenville SC based company into a regional leader in underground telecommunications”.

About Carolina Underground Solutions

Founded in 2015, CUS is a contractor providing drilling, directional boring, and trenching services for the installation of underground telecommunications cabling such as Fiber Optic and innerduct conduit. For more information, visit its website at <http://www.carolinaunderground.com>
