

COLLISION REPAIR

Global Fleet Collision Center can handle all your collision repair needs, from minor parking lot dings to full collision repairs. We use only the finest repair parts and top quality paints and materials to ensure your car, truck or motorcycle looks as good after the repair as it did when new.

This is what happens when you hit a deer. The guy was lucky. He nearly missed the deer so the damage to his car was relatively light.

The right front fender, head-lamp and bumper had to be replaced. The hood and front passenger door, though undamaged, were painted as well to make the repair undetectable.

After the process is complete, the car looks good as new!
