

Torquay Community House – The Young Wolves Program

What Is The Young Wolves Program

- We provide one-on-one tutoring for Grade 5 and 6 students in maths and literacy.
- Tutoring sessions are of 40 minutes duration (including about 5 minutes of discussion, if required, with parent and student) between 4.00pm and 6.00pm on Tuesdays and Thursdays.
- Sessions are not provided in the first and last weeks of the school term.
- Tutors are not formally qualified as such. However each has appropriate background and have working with children certification.
- Our main purpose in these sessions is to cover any learning that students may have missed in class or need repetition in.

What You Can Expect From Us

- A safe and friendly activity space, including the provision that there will always be at least two tutors on site.
- As far as possible we will maintain a consistent relationship between tutor and student.
- If a tutor takes leave we will inform you and you may decide to skip a session/s or ask us to provide a substitute tutor.
- We will discuss any issues with you and your child after each session.

What we Expect From You

- We expect you to ensure that students bring with them any relevant classroom material that they want to deal with. Term teaching outlines, if available, should be brought.
- To identify, if students have a more general requirement to cover particular areas of learning, what those areas are.
- To sign the attendance sheet in and out.
- To drop off and collect your child inside the building.
- **To call your tutor as soon as you are aware that your child will not be able to attend any session. This requires that you obtain your tutor's contact number/s.**
- To provide early notice of absences like school camps, travels and other predictable absences.

Communication

- Outside of being at sessions, our preferred communications media are email for general notices and text or telephone for individual contact regarding absences .
