ISRAELI MILITARY INDUSTRIAL COMPLEX

SUSPECTED ISRAELI NUCLEAR ARSENAL AND THE MID-EAST ARMS RACE

The purpose of this chart is to highlight the well-known military might of Israel and its speculative nuclear arsenal. It is believed that Israel possesses nuclear weapons since mid 1960s. The nuclear Middle-East arms race ensued. Although no official statistics exist, it has been estimated that Israel possesses 100 - 400 nuclear type of weapons. Because of the off-set in this balance of power, neighboring Muslim states as Iraq, Syria and Iran have sought their own nuclear programs. Israel seeing these other programs as a threat to its national survival. Israel preemptively struck at Iraq's nuclear reactors in 1981 and Syria's in 2007. Currently Iran is about to go nuclear. Israel takes the Islamic militant threats to wipe Israel off the map literally. A comparison will be made to other current estimated nuclear arsenals. A possible scenario of a mid-size nuclear burst over Damascus will be illustrated for its effects. This scenario is prophetically based on the Book of Isaiah 17. Israel may likewise strike Iran and/or Syria as the nations are playing a prophetic scenario that if is believable and true, will lead the entire world to the prophetic Battle of Armageddon.

THE ROAD TO DAMASOUS

(MEDIUM SIZE BOMB)

recorded in the Book of Acts. It would be estimated that around 1.7 million people

1500 Kiloton = 1000x Hiroshima

200 Kiloton Nuclear Burst

term 'Samson Option' is used to describe Israel's alleged nuclear deterrence strategy of massive retaliation with nuclear weapons as a "last resort" against the Arabs that are attacking them to the point of 'mutual assured destruction.1 It is taken from Judges 13-16 of the Bible. The whole Jewish world population stands at just over 7 million. Any threat from a nation of a genocidal attempt at extermination of the race and Faith is taken literally by the Jewish government. As it has shown in the past, Israel will not hesitate to strike first to pre-empt any chemical, biological or nuclear immanent threat. Hypothetically with a nuclear strike from either a Iranian nuclear device or Syrian chemical and/or biological devices would be catastrophic. As most of Israel's population & military complex is concentrated in the Tel-Aviv area, the Jewish population and most of

the infrastructure would be decimated by at least 1/3 or 33%. Thus it is the region that would be ideal for a 1st strike. The guarantee of national survival is one of who will preemptively strike first?

A launch from a submarine off the coast of Lebanon of an Israeli Jericho nuclear warhead would arrive in Damascus within 2 minutes from launch. Damascus proper **Norld Nuclear Arsenals** has a radius of 10 miles which includes the ancient center & 'Straight Street' that is دِمَشق DAMASHQ

Sources: From the Natural Resource Defense Council published in the Bulletin of the Atomic Scientists. Other nations far exceed the count as the USA, Russia and China.

The estimated figures come from the Carnegie Endowment for International Peace. The graph also depicts nearly all the top 10 Armies of the world ranked by Global Firepower.com. Of note, the major world religions each now has the technology to harness the atom for military purposes: Christianity, Atheism, Judaism, Hinduism and Islam. All these pretty much encompasses the whole of humanity on Earth of the modern eta. About half the countries listed are not party to the NPT which requires UN inspection and regular monitoring.

THE NUCLEAR RADIUS

The Jericho III has a range of (5000-7000 miles). It gives Israel nuclear strike capabilities within the entire Middle East, Africa, Europe, Asia and almost all parts of North America. as well as within parts of South America. A launch from a submarine off the coast of any land-mass would arrive in major world cities within 2 minutes from launch.

ISRAELI MILITARY COMPLEX

exporter of weaponries to other countries. Current overall Personnel is estimated to be at 3,511,190 with active Military at 187,000. The Israel Defense Forces differs from most armies in the world in many ways.

ISRAELI ARMY (IDF) צבא ההגנה לישרא

Total Land Weapons: 12,552

The IDF has served as Israel's armed forces in all the major wars and military operations. The number of wars and border conflicts in which IDF has been involved history has made it one of the most battle-hardened armies in the world.

זרוע האוויר והחלל Israeli Air Force

Total Aircraft: 1.964

Israel's Air Force is said to be the best in the world. Although Israel's Air Force lacks strategic bombers to deliver nuclear weapons over long range, its F-15I & F-16I Sufa fighter jets are capable of delivering nuclear weapons.

ווא Israeli Navy חיל הים הישראלי

Total Navy Ships: 64

Israel is believed to have an offshore nuclear second-strike capability, using submarine launched nuclear-capable cruise missiles. These devices can be launched from the Israeli Navy's Dolphin-class submarines.

המוסד Mossad

This agency is responsible for intelligence, covert operations, assassinations, counter-terrorism, bringing Jews to Israel from countries where Alivah is forbidden & protects Jewish communities worldwide. Mossad's former motto was from Proverbs 24v6 in the Bible: "For by wise guidance you can wage your war". Others translate it to mean, "By Deception, Thou Shalt Make War." The motto was later changed to Proverbs 11v14.

JERICHO NUCLEAR MISSILES

This is the name given to Israel's ballistic missile systems. The codename was taken from the Biblical city of Jericho.

A short range missile at 500 km 310 miles able to carry only about a 20 Kiloton Warhead (20x) that of Hiroshima. This first generation system is said to be now obsolete.

*

A medium range missile. It could be launched from a silo, a railroad flat truck, or a mobile vehicle. This gives it the ability to be hidden, moved ickly, or kept in hardened silos. This second generation system is signed to survival any 1st strike attack.

A long range missile. It is speculated that it is an ICBM has a three-stage solid propellant. It is possible for the missile to be equipped with a single 750 kiloton nuclear warhead or multiple low yield Multiple Independent argeted Reentry Vehicle (MIRV) warheads.

THE WALLS OF JERICHO

The city of Jericho was the 1st conquest that stood in the way of the Promised Land. It was Joshua, the successor to Moses led the Israelites out of the Exodus. The city was encircles 7 imes and on the 7 time, marched around 7 times to have the city walls collapse at the sounding of the Jewish Shofars.

NUCLEAR NON-PROLIFERATION TREATY

Israel does not adhere to the Non-Proliferation Treaty as other countries such as India and Pakistan. Its Nuclear Arsenal is an 'open secret'. The Israeli government maintains a policy of deliberate ambiguity. Much of what is known about Israel's nuclear program comes from revelations in 1986 by Mordechai Vanunu, a technician at the Negev Nuclear Research Center who served an 18-year prison sentence as a result.
