To Whom It May Concern:

I have been doing business with Mr. Doug Kappel and Kappel Dental Arts since 1997. I am a Board Certified Prosthodontist with over 30 years' experience. I have found Doug to be a very personal and caring dental technician. The dental laboratory skills he has developed over the last 30 plus years make him very knowledgeable in constructing crowns and bridges. He is very conscientious and strives to produce a dental laboratory product which will both satisfy the most discriminating dentist and patient. He has extensive knowledge of dental materials and has a state of the art dental laboratory with optical scanners and computer controlled milling machines for complex crown and bridge and implant applications. He is very knowledgeable in occlusion and esthetics. He has always been willing to work with me to produce the highest quality ceramics and implant crowns for my patients. I would highly recommend him for all your fixed dental laboratory needs. He really cares for the quality of the cases he produces.
