

Voting Method

For a motion to pass, there must be a quorum of board members participating from which a majority of the quorum votes to approve the motion.

In order to vote, a board member must be present, in person or by telephone, for the entire discussion of the action item. Though allowable, voting by telephone should be used sparingly.

Votes shall be taken by voice or a show of hands. All actions taken or motions passed or denied in board meetings shall be recorded. Any Board member may request a roll call vote as to any vote that is taken.

Adoption of a new policy will not occur until there have been two readings of the policy occurring during two separate board meetings. A policy may be amended or repealed with unanimous consent of those members participating and constituting a quorum upon first reading or upon action of a majority of the board members participating and constituting a quorum after second reading.
