# Rotary Lobe Pumps

GTech USA supplies a vast variety of Rotary Lobe Positive Displacement Pumps on standard skid package or customizable to suit your needs. These pumps are superior for pumping sludge, mud and thick fluids. The Maintenance in Place design allows the quick and convenient maintenance or replacement of all wear parts, without disconnection from piping, drives or other components.

Features:

- Flows Up to 5,000 gpm and 180 PSI
- Low Shear
- Reduced Life Cycle Costs
- Dry Run Capability
- Replaceable Rotor Tips and Wear Liners
- Global Service
- Significant Rotor Variety for All Models
- Replicable Rotor Tips for FL Series
- Customizable
- Maintenance in Place
- Custom Built VFD Enclosures Available
