### Did you know...

The City of Aurora, School Districts 129, 131, 204, 308, Waubensee Community College, and the Aurora Regional Chamber of Commerce have formally joined together to assure the development of career pathways accessible to all students in the areas of Health Sciences, Information Technologies, and Manufacturing by the 2015-16 school year and to continue to grow additional Pathways for its students in the years beyond.

### They came to agreement because...

- **A nationwide and regional shortage exists for skilled workers and college ready high school graduates**
- **While nearly all – 96 percent – of chief academic officers surveyed said they are confident that they've prepared graduates to be successful in the workplace, just 11 percent of business leaders surveyed in the new Gallup/Lumina poll agreed with that statement.**
- **Eight of every 10 Illinois jobs require more than a high school diploma.**
- **The proportion of adults in Illinois with high-quality degrees and credentials is only 44% currently and the Illinois P-20 (Pre-K through age 20) Council has established a goal to increase to 60% by the year 2025. Nearly 2/3s of all jobs need such credentials.**

It has been determined through asset mapping that the most potential for careers in the Aurora region are in the areas of Health Sciences, Information Technologies, and Manufacturing, **Think about the following questions:**

### 1. How many careers in IT can you name?
