Subject: Zoning Codes, Old and New

It is my impression that the new code is substantially larger than the older code. One useful measure is a word count.

I do not have access to tools to count the words. I assume that the City has both volumes in editable format, e.g. MS Word, where word counts are automatically provided. Please provide comparative word counts in the next information release on the Zoning Code.

Thank you. -Gary Vandeman jcarman@cityofgoleta.org
