## QUEEN PALM

Scientific Name: *Cocos plumosa*

Growth Pattern: Single, tall, usually straight, gray-brown trunk, smooth but ringed by leaf scars. Old boots persist below fronds.

Description: Fronds unarmed, dark green, arching, feathery, to 15' long with wide bases and long petioles. Midrib prominent.

Soil and moisture: Tolerant of most soils.

pH Preference: 5.5 – 6.5

Salt tolerance: Poor

Freezes at about 20 degrees F

Growth Rate: Moderate to fast.

Landscaping Uses: Specimen, framing, background, avenue, and group plantings.
