www.zaxisinc.co

Zaxis, Inc. – Modular design leak test instruments and systems.

- Test types include pressure decay, vacuum decay, mass flow, occlusion, burst, pressure cracking and chamber testing.
- A full line of valves, fitting and connection devices are available to properly suit your application.
- Custom test stations including part nesting, tool plates, 3D modeling to provide a turn-key solution.
- Multi-channel systems available that run concurrent tests from one leak test instrument.
- Compatible with EtherNet/IP.

Telesis Technologies, Inc. – Market leader in manufacturer of permanent marking systems.

Telesis produces a full line of laser and pin stamp permanent marking systems.

- Laser systems include Fiber, CO2, Dual-Head, Vanadate, Ultraviolet and Green technologies
- PINSTAMP® dot peen systems include tabletop and hand held models.
- Custom solutions include robotic integration and turnkey work stations.

Weiss North America, Inc. - Manufacturer of high quality cam, servo and linear motor driven automation components.

- Rotary and ring indexers, cam or servo driven.
- Palletized conveyor.
- Linear motor driven pick & place units, rotary linear systems.
- Machine bases and tooling plates

BalTec Corp. - The innovative Swiss riveting machine manufacturer that is the technological trend setter in this industry.

- Processes include radial and orbital forming, roller forming and pressing assembly operations.
- BalTec HPP-25 is the most advanced process monitoring and control system on the market today.
- Small work cells including rotary tables and X-Y-Z positioning systems are available.
- Custom fixtures and part nesting.
- Industries served include automotive, medical device, aerospace, hardware and electrical

Performance Feeders, Inc. – Manufacturer of vibratory, centrifugal feeders, storage hoppers, bulk elevators and conveying systems.

- Custom tooled vibratory feed systems, storage hoppers and inline conveying systems.
- Custom tooled centrifugal feed systems for high feed rate applications.
- Part isolation devices, dead nests and escapement mechanisms.
- Base plates and tables for system mounting.
- Standard and custom conveying systems, online configurator on web site.

Weber Screwdriving Systems, Inc. - Manufacturer of precision fastening systems including screwdriving and insertion applications.

- Modular screwdriving spindles with or without automatic feed system.
- Bench-type screwdriving stations for manual and semi-automatic operations.
- Handheld automatic feed systems with air or electric drive systems.
- All systems available with DC Electric or Pneumatic drive systems.

TOX Pressotechnik - Designs and builds standard and custom press and joining solutions and systems.

- Extensive standard manual, air-to-oil and electric servo driven presses
- Custom press solutions with short lead times
- Patented TOX sheet metal joining technology
- Joining solutions are our forte (riveting, clinching, swaging, crimping and extrude and roll to name a few)
- Industries served include Automotive, Appliance, Medical, Consumer Products and Ordnance

WISCONSIN OVEN

www.wisoven.com

Wisconsin Oven Corp. – Design and manufacturer of industrial ovens and other heat processing equipment.

- Applications including heat treating, finishing, drying, composite cure, annealing, stress relief and curing.
- Systems include standard & custom batch ovens, custom conveyor ovens, washer/quench tanks, incinerators and heat treat furnaces.
- Full service department offering start-up & training, installation, PM programs, modification and refurbish, uniformity services and oven relocation/rebuild services.

Alliance
Manufacturing, Inc.

www.alliancemfginc.com

Alliance Manufacturing, Inc. - Manufacturer of industrial parts washers and parts cleaning systems.

- A full line of aqueous parts cleaning systems, including belt, indexing, monorail, front/top loading cabinet wash systems.
- Design and build custom systems engineered for specific cleaning applications.
- Patented removable washer canopy for full-access to washer interior for process adjustment and maintenance.
- State of the art parts testing labliness testing provides cleanliness capabilities.
- Washer designs incorporate maintenance friendly features to maximize

www.kecoatings.com

Keco Coatings, Inc. - Nationally recognized industry leader specializing in developing and applying lab-tested and technically superior coatings.

- One of 23 licensed Chemours Teflon® industrial applicators (LIAs) in the U.S.
- Coating portfolio includes antimicrobial, automated powder, ceramics, dry film lube, epoxy, liquid, plasma, thermal barrier thermoplastic, and plasma.
- Service industries include aircraft, automotive, CPI, food processing, HVAC, lighting, OEM, packaging, pharmaceutical, semiconductor, transportation, and more.
- ISO 9001:2015 certification.
