STANDARD FEATURES

UNPRECEDENTED ENERGY EFFICIENCY!

DESIGNED TO WORK LIKE A CHARM—WITH VINYL DESIGN PERFORMANCE THAT'S BUILT TO LAST

SMOOTH AND QUIET

These doors slide open smoothly and quietly thanks to:

- Patented dual-tandem nylon wheels
- A raised rail to protect the wheels from dirt and debris

Sturdy all-aluminum angle-legged tracks

Competition

Vinyl Design

- Perfectly straight and carefully adjusted parts to minimize friction and make for smoother operation

MULTICHAMBER DESIGN

Our multichamber design reduces thermal exchange and, with more enclosed air space than other brands, increases insulation values—without the addition of costly, less recyclable insulating material.

THE SOUND OF SILENCE

Shhhh... Enjoy the sound of silence! Multichamber profiles and multiple weatherstripping help eliminate most outside noise.

INCREASED PROTECTION

Fixed and mobile panel rails meet and interlock perfectly, making removal from outside almost impossible. Lower sill design provides safer entry and exit.

OUTSTANDING RELIABILITY

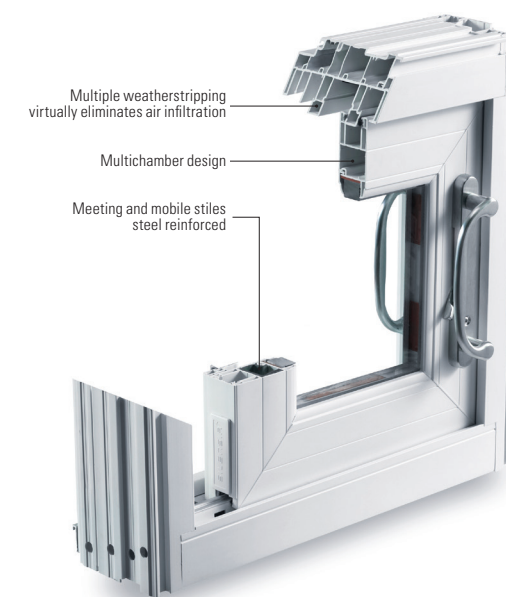

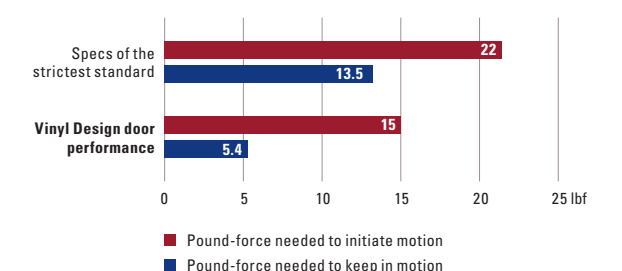

Engineered to perform at PG60 levels at all sizes up to 70-7/8" x 81-7/8", this door provides reliability that will stand the test of time, and is particularly watertight.

Try the VDC fingertip test: bet you can open this door with just the tip of a finger! The easiest door to operate in its category.

INSTALLER-FRIENDLY DESIGN

Installer-friendly design and room for panel adjustment mean uneven surfaces are never a problem—it's a snap to plumb and square Vinyl Design Doors.

OPERATING FORCE TEST

- Performance that meets the highest standards in terms of energy efficiency and meets the latest Canadian and American energy standards.
- Design that allows for optional 1"-thick triple-glazed sealed units, with or without integrated aluminum blinds.
- Efficient division between the glass and steel reinforcement, reducing significantly the risks of condensation.

CLEARLY THE HIGHEST VALUE FOR YOUR MONEY.

CONSERVATION

We're into Conservaction®!
Our patio doors not only offer unique and distinctive nical features—they're also all specially designed to save energy and preserve natural resources. Longer product life, and the best energy performance in the industry!
