

Preparing your fiber to be processed at Pioneer Fiber Mill:

- Remove as much vegetation & debris from the fibers.
- Have a realistic understanding of the quality of *Your* fiber.
- Keep First Cuts Separate.
- 2nds & 3rds can be processed into Bumps - when kept separated from Firsts.
- DO NOT send pest contaminated fiber: lice - larva - moths - scurf - nothing!
- Fibers with pests, scurf, cotted, or felted will be refused & returned at your expense OR disposed of - we will provide documentation & photos.
- Wools & heavily soiled fibers will have additional cleaning fees.
- NO MOTHBALLS! - We cannot accept anything that smells of them.
- Combine Fiber: similar colored - staple length - quality into larger batches.
- Staple Length: Minimum 2.5" - Maximum 6".
- Small volume batches are subject to "Millers Choice" to optimize efficiency.
- "Millers Choice" is us making the determination to blend batches and achieve the highest quality, highest yield, and most beautiful products for you.
