

PLEIADIAN COLUMBIA

The purpose of this illustration is to show that the District of Columbia with the Pentagon emphasis is configured to the Cydonia, Maris Pleiadian pattern. This pattern is present in all the other major world capitals. There are 3 main components that involve a financial city that is build up, then there is an oval type of structure to correspond to the Face of Mars, as in this case the Oval Office. The Pentagon corresponds to the D&M Pyramid that is usually a fortress or prominent building. The entire Cydonia, Mars complex configures a hexagram that when superposed to the Columbia area produces an approximate correspondence with prominent landmarks at the junctures. Along with the ley-lines, there are unique measurements that span the distances from one component to the next. The measurements are an approximation based on GoogleEarth coordinates. All the prominent world capitals have this motif as a signature of a sacred knowledge that is very important and hidden in plain sight. Who are the peoples behind this worldwide composition that extends back to the ancient pyramid sites of the world?

In this rendition of the reflection from the Pleiades in the Cydonia, Mars configuration has the position flipped horizontally, truly a mirrored image on Earth as it is on Mars. This pattern in DC is almost in the same position as that of the City of London with the financial skyscrapers corresponding to the stars of the constellation.

THE PLEIADES

Are these hexagram motifs and places on Earth a combination to pierce spiritual dimensions? What is the connection to the planet Mars and the veneration of the God of War? Why is sacred geometry used and impeccable mathematical relationships used in the architecture of world capitol and ancient buildings such as pyramids and ziggurats? Evidently the rules of the world who have all the resources and power go to great lengths to incorporate this religion that mirrors the cosmology of the stars.

PYRAMID CITY Roswell, Virginia

WHITE HOUSE THE OVAL OFFICE

One theory behind the constellation motifs etched in the architecture and positioning of landmarks is to keep track of time, celestial time at that. The various pyramid configurations for example are based off of the Great Pyramid of Giza which is considered by some as an astronomical and astrological 'clock of the universe'. Based on the longitude to coordinate theory, the various measurements correlate to encrypted years.
