

# Wood Blinds

## Features

- > Offered in a variety of slat sizes fit any window size
- > Over 40 colors and styles, from whites and neutrals to rich wood tones
- > Decorative styles including Ultra Grain, distressed, rustic and bamboo add a unique design
- > A stylish collection of optional solid and decorative tapes add a fashion accent
- > Your choice of valance styles – traditional Decorative or contemporary Crescent
- > Innovative magnetic valance attachment system is secure, easy to install, and fully adjustable
- > Modern trapezoid bottomrail shape improves appearance and enables blinds to close tighter
- > Limited Lifetime warranty ensures your customers' satisfaction

## Slat Sizes

- > 1 3/8" – designed for smaller scale windows – provides more view-through and less stack than a traditional 1" blind
- > 2" – standard slat size ideal for any size window
- > 2 3/8" – larger slat size provides optimal view-through, economical alternative to shutters

## Slat Styles

- > Natural – Traditional style offered in whites, neutrals, and a variety of classic wood stains
- > Ultra Grain – Refined grain styles with a rich tone-on-tone appearance
- > Rustic – Features knots and grain variations, offering unique appeal for casual settings
- > Distressed – The appearance of aged and weathered wood with subtle tone-on-tone grain
- > Bamboo – Real bamboo in natural tones that blend with today's decorating styles

## Valance Styles

- > Decorative 3" valance – traditional design with classic style
- > 3" Crescent valance – sleek, contemporary shape that's great for modern room settings
- > All returns are glued on, offering a finished look and saving installation time. Custom return lengths from 1/2" to 6" available upon request.

## Decorative Options

### > LIGHTSOUT FEATURE

Routeless design that reduces light leaks and enhances privacy.

### > SOLID AND DECORATIVE TAPES

Available in an array of colors and styles to add a decorative accent, block light coming through route holes, and enhance privacy. Tapes can also be added to the decorative valance to provide a completely coordinated look.

### > ROUNDED CORNERS

Softens the blind's appearance for no additional charge.

## Control Options

### > STANDARD TILT AND LIFT CORDS

Our lift cord features a Break-thru safety tassel that separates under pressure, making it safer for children and pets. Optional Wand Tilt Control – available upon request

### > CORDLESS LIFT SYSTEM

Lifts and lowers blinds with ease. Eliminates lift cords making them safer for children and pets.

### > REMOTETILT MOTORIZATION

Battery-operated system that tilts blinds open and closed with the touch of a button. Two systems available:

Infrared (IR) – value choice that is ideal for operating individual blinds from up to 30 feet away. Requires line of sight positioning.

Radio Frequency (RF) – robust system with enhanced programming that is ideal for independent or grouped operation of multiple blinds. Remote control operates from up to 90 feet away with no line of sight required.

## Hardware and Installation

- > Slim design low profile headrail – strong enough to cover large windows with a single blind, yet slim enough to reduce stack and allow more view
- > Color-coordinated box mounting brackets – are quick and easy to install
- > Spacer blocks, extension brackets, and hold down brackets – also available for installation flexibility
- > Innovative, proprietary magnetic valance attachment system – allows for easy up/down, front to back placement adjustment. Makes valance installation quick, easy, and secure
