

APEXSMARTe

SMARTe is designed to support clinical decisions with business reasoning (regarding component selections) while providing better care involving your patient.

WHY SMARTe?

- Analyzes over 50,000 possible component combinations of Knees, Feet, and Vacuum Systems
- Provides best product combinations for over 40 patient types (by K level, Amputation level, Weight Limit, etc.)
- Accounts for individual practice's discounted pricing from manufacturers
- Each patient type and with component combinations have L Codes loaded into practice software
- Individual practice becomes 'CodeWise' and won't miss any L Codes
- Provides selections for multiple fee schedules (payors) per state
- Adjusts to changes in fee schedules, prices, new or discontinued components, temporary discounts
- Resulting component selections are loaded into each individual practices' management software for use while in the patient room.

Applicable discounts

R

Rules (products that cannot be combined)

T

Time-saving application

e

electronically available in the patient room

While some practice management software systems provide a tool for 'job costing', this is usually done AFTER the components are selected. SMARTe provides a tool that allows 'margin analysis' BEFORE the components are selected.
