**BOIL WATER NOTICE
TO
THE RESIDENTS OF TOWN OF SUMMERTON**

October 12, 2021

The Town of Summerton advises the residents located at Gin Pond Shores, to vigorously boil their water for at least one (1) full minute prior to drinking or cooking. Bacteriological sampling has indicated that the water system may be contaminated. An assessment and resampling of the water system is being performed. Once bacteriological samples that are collected by Water Systems, Inc. from the drinking water system serving the Gin Pond Shores area indicate that the water system is not contaminated, the boil water notice will be lifted. Residents should continue to vigorously boil their water for at least one (1) full minute prior to drinking or cooking until otherwise notified by the Town of Summerton. Also, any ice made from water which has not been boiled should not be used for drinking purposes. Water Systems, Inc. is presently working to correct the problem. If you should have any questions concerning this Notice, you may call the Town of Summerton.
