

*** UPDATES FROM WENDOVER & WEST WENDOVER ***

As we get closer & closer to Speedweek 2020, we would like to keep you informed of what's happening in town.

In a message from West Wendover, Nv. Mayor Daniel J. Corona wants to let us know that restrictions on the Nevada side are different from Wendover on the Utah side. Along with masks in public, there are 50% occupancy caps at markets, restaurants & casinos. Bars are currently closed, along with local parks, gathering of no more than 10 people, also social distancing is in place. We would like to thank Mayor Corona for keeping us up to date of the Nevada side. Please remember we are guests in both of these cities and need to be respectful in everything we do there.

We have reached out to Smith's Foods, who always take care of all our needs at Speedweek. They are looking forward to serving us once again! They have lengthened their hours to help us. (they'll be open until 11pm). To help them we ask that you shop in off hours, like early morning or in the evening. Remember the residents of both towns here depend on Smith's for most of their grocery needs. In these "crazy times" there are some items in short supply as you all know. If possible try to bring these items with you. Other than that, they're ready for business as usual! Of course there are some COVID stipulations just like everywhere else. Masks at all times, social distancing & pretty much just plain old common sense. They do have a store capacity of 264 at a time. They don't think that will be a problem if we shop during the off hours. They're doing their best for us so let's give them our best too!

Stay tuned for more updates as they happen!
