

IAEP, Inc. is happy to announce that we are offering DE Hoof Taps for use with our Perfect Hoof Wear and for use in the treatment of common hoof deformities. IAEP has entered into a distributor agreement with DE Hoof Tapes with the goal of making this product readily available to the hoof care provider. Now available for purchase on our website. Follow the link provided at the bottom of this page.

Case study: Perfect Hoof Wear and DE Hoof Taps

Horse: 14 year old TB mare

Mare suffered a solar abscess that erupted at the heel.

Sole depth was marginal and stability was compromised.

Horse presented a grade 2 lameness.

Method: Following trimming to the axis plane hoof taps were placed at the quarters forward of the seat of the corn. Silvetrasol hoof wash was applied followed by the application of the Perfect Hoof wear. Prior to the hoof wear setting hoof taps were placed at medial and lateral at digital break over (pictured).

Results:

The photos show the results at 5 weeks following application.

Following application of appliance lameness was no long observed.

Perfect Hoof Wear provides stability and stimulus by allowing for controlled distortion.

Hoof taps provide for increased traction and reduction in wear.

Silvetrasol spray gel provides a protective barrier against bacteria, fungus, and viruses.

- Provided immediate relief
- Increased sole depth
- Improved stability
- No heel migration
- Retained balance
- Improved Frog Stay health
- Improved Heel integrity
