

## I3 Orange Line Project- Irving, TX

I3 Orange Line Project - Irving, TX Prime consultant selected by Dallas Area Rapid Transit for drainage design and project coordination for a segment of the DART rail line inside of DFW airport (I3). MVE developed drainage and grading plans, and evaluated the storm water impact on the rail ballast and sub-grade. MV Engineering identified and coordinated the resolution of conflicts with existing and proposed utilities. Provided guidance and coordinated the placement of design elements with systems, structural and track designers.
