Box Trucks and Trailers Frames Fabricated with the TS23 Extrusion

TS23 Extrusion

Our tension frame system, based on the TS23 extrusion, is chosen for box trucks and trailers projects for the following reasons:

- 1) Impeccably stretched vinyl banners (See photos hereafter)
- 2) Easy to change printed graphics
- 3) Unbeatable cost per foot.

A great, low-cost and simple solution for truck fleets.

All our aluminum and PVC extrusions are 100% recyclable.

Our entire aluminum and PVC extrusion product line is designed and manufactured in the USA.

How does it work?

Have a look to our video...

You can see the perfect stretch of the printed vinyl.

So long to rivets, bars, etc. and hello to easy graphic changes. Our Banner stretching system works great even for non-rectangular frames, as shown on this photo.

(Material *cost* for two frames - both sides of the box truck - \$504.00, + Shipping)

Or just \$252.00 per banner stretching frame!

Installation Details

The white PVC insert is maintained by screws to reinforce the banner fixation and secure it especially at high speed on highways.
