Redbud (Eastern)	\$40

### Shade Trees

#### **Mt Fuji Flowering Cherry**

A magnificent show-stopper with showy clusters of fragrant white flowers backed by bronze-tinged new foliage. Works well as a single specimen or lawn tree in smaller landscapes or in groves for magnificent impact in larger landscapes. Excellent for use as a shade tree. Deciduous. Moderate growing; reaches 20 ft. tall, 25 ft. wide.

#### **Krauter Flowering Plum**

The Krauter Vesuvius Purple Leaf Plum is a small tree, reaching 15 to 20 feet tall and spreading about the same distance wide. It has a dense, upright crown of many branches, and in spring they are covered in a profuse blooming of small pale-pink flowers.

## Raywood Ash

Raywood Ash, botanical name *Fraxinus oxycarpa* 'Raywood,' is a Mediterranean native that can grow to be a large tree with a round-headed form, so it is capable of providing the right amount of summer shade! It's a favorite in landscapes throughout the Southwest both for its shade coverage as well as the beautiful fall color it brings to yards! In the fall, the attractive dark green leaves turn to an alluring red wine color. Once the leaves fall, it can let the warmth of the sun in, and you'll only need to do a one-time easy cleanup! The foliage comes back in the spring, just in time to cool off your home and keep you comfortable while you're enjoying your yard! Grows up to 60-70'.

## Maple (Autumn Blaze)

The Autumn Blaze maple tree boasts beautiful fall foliage and has a shapely form, making it a focal specimen when landscaping a large area. This tree is a hybrid of the red maple and the silver maple, both native to North America. With densely balanced and ascending branches and an oval crown, the Autumn Blaze maple tree matures quickly and can grow as much as two feet per year under the right conditions. This variety of shade tree is pollution-tolerant (an important factor if you plan to grow one along a busy street) and suitable for urban areas. 40-55 feet tall, 30-40 feet wide

## Maple (Red October Glory)

'October Glory' is a popular one for its spectacular display of fall color. October Glory red maples are also popular because they grow vigorously and easily. If you need a tree that will grow fairly quickly and fill out some space with great color in the fall, this is a good choice. October Glory grows to a height of 40 to 50 feet.

## Maple (Red Sunset)

'Red Sunset' maple is the trademarked name for a popular 'Franksred' cultivar of the North American red maple species (*Acer rubrum*). This 40-to-50-foot cultivar is grown for the richness and reliability of its fall foliage color, turning from green to brilliant red, and for its cold hardiness. Plant it in a location with at least six to eight hours of sun with at least 40 feet of width to accommodate its adult size.

## Oak (Shumard)

Shumard oak is an ideal tree for urban landscapes, including both home yards and commercial settings. It's often seen in parking lot islands, since it copes well with air pollution, poor drainage, drought, and compacted soils. Many gardeners appreciate Shumard oak for its interesting foliage. It features traditional oak-shaped leaves that are dark green throughout most of the year. Then in fall and winter, the 4- to 8-inch leaves turn a brilliant red or red-orange before falling to the ground. It makes a lovely shade tree, thanks to its broad, open crown that gets more rounded as the tree gets older. Once mature, trees can reach 80 feet tall and have a 50- to 60-foot canopy.

## Redbud (Eastern)

The Eastern Redbud (*Cercis canadensis*) is a decorative tree with heart-shaped leaves and striking pink to purplish spring flowers. Native to eastern North America, the small to medium-sized tree is highly versatile and enhances garden landscapes. Its ornamental features make the eastern redbud tree a popular ornamental tree for landscaping gardens. Eastern redbuds grow as large shrubs or small multi-stemmed trees. They reach a height of 20 to 30 ft. (6 – 9 m) and a width of 25 to 35 ft. (7.5 – 10.5 m). The branches grow in a horizontal pattern and form a rounded crown when mature.

## LIMITED Online Tree Pre-Orders

**Link ([www.AtwaterFFA.org](http://www.AtwaterFFA.org) Homepage) Opens on Wednesday, April 24<sup>th</sup> at 7am SHARP. Details Below:**

*The following is a PRE-Order / Pick-Up Form for the Atwater FFA Plant Sale. While the plant sale is Friday and Saturday, THIS Pre-Order Form is for FRIDAY, (8am - 4pm) through Saturday, (8am - 11am) ONLY. All unclaimed, unpaid, and picked-up trees will go back out for public sale after 11am on Saturday for a "1st come, 1st served" sale format. The form will be revised/updated based on availability, and a NEW Pre-Order Form will be available after 5pm Friday for Saturday.*

*Pre-Orders will be based on a "first come, first served" basis (the order/time the form is received). A few trees will be made available for "1st come, first served" when the plant sale open.*

*All submitted forms will be reviewed by Atwater FFA and they will contact and confirm your order request to communicate if all items are in stock or available.*

*The Pre-Order Form is LIMITED to trees only.*

*All other plant stock such as succulents, vegetables, or individual annual/perennials can be selected in person and added to the pre-order plants/tress upon pick-up.*

*All non-pre-ordered trees available (not sold) will be on display and for sale on Friday/Saturday for "walk-ins" (based on supply, 1<sup>st</sup> come, 1<sup>st</sup> served)*

*Cash, Checks, and Credit Cards will be accepted upon pick-up/receipt. Payment for pre-orders will be completed upon pick-up.*

*Customers will be notified via email if their pre-order tree request was confirmed. If you do not receive a confirmation, the tree(s) were sold out prior. Tree stock updates will be made regularly online.*

**All tree stock is limited. Customers will be confirmed via email if pre-order request is confirmed/available.**
