## Opportunity to Review Draft Forestry Plans

Sakaw Askiy Management Inc. holds the forest management license for the Prince Albert Forest Management Agreement (FMA) area. The license gives our shareholders access to harvest wood for forest products mills and requires that good forestry practices, including forest renewal, be followed. Our shareholders are Agency Chiefs (AC) Forestry, Carrier Forest Products, Edgewood Forest Products, Meadow Lake Mechanical Pulp, Montreal Lake Business Ventures, NorSask Forest Products, and Tolko Meadow Lake OSB Division.

Sakaw Askiy will be holding the following information sessions to seek your comments on a draft Forest Operating Plan for a 5-year period starting in 2020. Draft maps of plans for the local area will be available to discuss with Planners in an open house format. There will also be an opportunity to discuss the 20-year Forest Management Plan for the entire landscape.

The Forest Operating Plan will outline "year 1" areas, planned for harvest and renewal between April 2020 and March 2021 in detail, and plans for years 2-5 more generally. It will be submitted to the Forest Service on December 1, 2019 for review, Aboriginal consultation and approval. Once approved, the year 1 areas (2020-2021) will not require subsequent stakeholder engagement unless there is a significant change to the harvest design. The Forest Service is notified before the operations begin.

The draft Operating Plan maps will also be available for viewing at the offices of all Sakâw shareholders, or you can contact the appropriate area Planner, as follows:
