

Dewborne

5000 SERIES

WATERBASE

SANDING PRIMERS

Archemya's 5000 Series Dewborne Sanding Primer is a flexible waterbase sanding primer that is a high-build formulation designed for plastic bumper refinishing. Archemya's 5000 Series Dewborne Sanding Primer hides sanding scratches as coarse as 180 grit and cures rapidly. Archemya's 5000 Series Dewborne Sanding Primer will provide excellent water and chemical resistance as well as outstanding sanding properties. This product is compatible with all automotive topcoat systems and can be cross-linked up to 2-3% by volume with Archemya's 5130 Series Dewborne Hardener to enhance its properties. Archemya's 5000 Series Dewborne Sanding Primer has low VOC and an excellent freeze thaw stability (up to four cycles), and is always ready to spray out the can to provide the desired OEM type of finish.
