

Pat Hergott - Yarder Engineer

Before Pat came to A.F. Timber, he was in a job that kept him inside a building all day. What he really wanted was the opportunity to work outside and be part of the logging industry, so he decided to make a career change and joined our team in the fall of 2013.

Naturally, being outdoors is a big part of Pat's life so when he's not at work, he enjoys skiing, camping, hiking and boating. He loves a good bonfire with friends and family.

Pat also dedicates time to volunteer in his community with the Balfour Harrop Volunteer Fire Department.

His says what he likes best about running the yarder and working with A.F. Timber is the challenge of each different setting. He likes to track the number of drags the guys send up the hill each day. Pat says that he really appreciates that the team focuses on keeping things tidy, and the right way every day.

A fun fact about Pat is, when he was 9 years old he hung out with the Edmonton Oilers for a week and even has a picture of him and the famous goalie Bill Ranford. This was a highlight of his childhood and a very cool experience for him.

Pat is happy he decided to take the plunge and change careers, he says that the views that greet him on the landing are a highlight of his job.

We are fortunate to have Pat at the controls in the yarder!
