

AIMS Academy

Summer Program 2015 June 8th - August 14th

Students that enroll in AIMS Academy's Summer Program will be able to participate in a wide variety of learning experiences including: exploring the joys of **Reading and Creative Writing**, previewing **fundamental Math** concepts for the next school year, and being immersed in our **Language** classes (ESL, Chinese, Spanish).

We encourage students to discover new talents and interests this summer by engaging in astonishing **Science Experiments**, exhilarating **Historical Adventures**, and expressive **Arts and Crafts!** For students that thrive on challenges, we also offer **Advanced Classes**.

Welcome to a fun and invigorating summer of learning at AIMS Academy!

AIMS ACADEMY 2015 SUMMER PROGRAMS

Language Arts Workshop

Our Language Arts Workshop focuses on reading, creative writing, grammar, and phonics.

Reading Workshop will focus on engaging students through literature while incorporating COMMON CORE strategies. Project Based Learning will engage students through hands-on activities.

Creative Writing Workshop offers a supportive and fun environment where students develop a portfolio while writing Narrative, Descriptive, Persuasive, Expository, and Imaginative essays.

Math Workshop

Math Workshop provides an opportunity for students to **preview key concepts** for the next school year. Students will have a jump-start on practicing, learning, and enhancing their mathematical abilities.

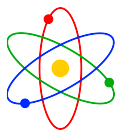

Language Classes

AIMS Academy will provide **Chinese, Spanish, and ESL** to students throughout the summer. Students will receive instruction on the fundamentals of Listening, Speaking, Reading, Writing, and Culture.

Fine Arts and Crafts Workshop

Our workshop will focus on artistic techniques while enabling students to have fun and discover the artists within themselves. Students will be able to express themselves through **sketching, painting, and creating** works of art.

Science Exploration

Through **hands-on experimentation**, students will be educated in a wide variety of scientific areas. Whether it be building a volcano, growing a crystal, or conducting a chemistry experiment, this program will be electrifying!

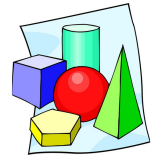

Historical Adventures

History is full of intriguing stories about events and lives of the people who lived through them. Students will **bring historical stories to life** by merging history with theater. Performance and speaking skills will be elevated by acting out historical scenes.

Advanced Classes (Optional)

Geometry is designed for the students that have a keen interest and passion for mathematics. Through this program, students will have a leg-up on fundamental Geometry concepts next year.

Web Design is a skill set that is growing in demand. Students enrolled in this Web Design program will be able to design their own website in HTML and CSS by the end of this course.

Robot Car class will offer students the opportunity to build their own robot car! Students will learn the basics of circuitry, electronics, and the scientific method.

Reading Club is for voracious readers that love to talk about the books that they are passionate about. Experience books in a whole new way through this reading club!

Other Programs Offered

- SAT Writing, Critical Reading
- Calculus, Biology, Chemistry
- One-on-One Tutoring (K-12th grade)
