

PERSONALYSIS

What is PERSONALYSIS?

Personalysis is a personality assessment that supports people's ability to THRIVE by helping them decode their natural patterns of communicating, decision making and contributing their best work.

The simple, 15-20 minute online questionnaire generates a Personalysis Profile and *Colorgraph*.

Personalysis is a framework for thriving personally and professionally, offering insights into how to achieve and sustain high performance AND develop stronger relationships.

INDIVIDUAL Colorgraphs

At-a-glance view of individual uniqueness

TEAM Colorgraph

PERSONALYSIS and teams

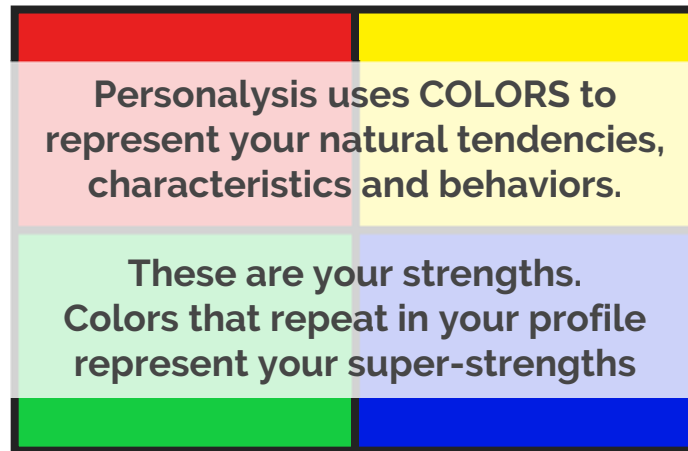

Teams also have a 'personality': dominant tendencies and default ways of communicating, making decisions and taking action.

Using each team member's individual results, Personalysis generates a Team Profile and Colorgraph that reveals the natural strengths and potential blind spots of the group. This team tool offers critical insights to help the team enhance trust and collaborate most effectively.

PERSONALYSIS

The three levels – the **DIMENSIONS** – represent different aspects of your personality and tendencies in different situations.

The colors in each dimension represent what you **LIKE** to do, the kinds of things you (and other people) **SHOULD** do, and what you **NEED** to feel safe, trust others and make decisions.

Discover how Personalysis can help you and your team thrive.
